PUBLIC WORKS DEPARTMENT,
FORT ST. GEORGE, 20th November 1868

No. 3,647.

No. 439.

To

HIS EXCELLENCY THE GOVERNOR OF THE
FRENCH SETTLEMENTS IN INDIA

SIR,

IRRIGATION, No. 21.

1. I have the honor to acknowledge receipt of your Excellency's letter dated 20th ultimo, and to express my best thanks

for the frank acknowledgment that the previous calculation of the French Engineer of the relative volumes of water proposed to be apportioned to the Coodamoorty and Arasalar rivers, was open to correction.

2 Desirous of reciprocating the friendly sentiments with which your Excellency's views on the subject have been communicated to me, and being, moreover, anxious to remove any apprehensions which may be experienced by the cultivators of injury resulting to their interests from the construction of the proposed works, especially by those beyond the limits of the British territories, I at once acquiesce in the re-arrangement now proposed by your Excellency, by which a volume of about 25,000 cubic yards per hour in addition to that originally designed by the British Engineer (viz, 583,000 cubic yards per hour) will be passed into the Coodamoorty, and which will then place the supply on the same basis, proportionally to the cultivation, as that of the Arasalar

3 Instructions to the above effect have accordingly been issued to the Superintending Engineer, 6th Division.

Accept, Sir, the assurance of the high consideration with which

I have the honor to be,

Your Excellency's

Most obedient and humble servant,

(Signed) NAPIER.

sentiments with which
Your Excellency's views
on the subject have been
communicated to me,
and being moreover anxious
to remove any apprehen-
sions which may be
experienced by the culti-
vators of injury result-
ing to their interests from
the construction of the
proposed works, especially
by those beyond the limits
of the British territories,
I at once acquiesce in the
re-arrangement now
proposed by Your Ex-
cellency, by which a
volume of about 25,000
cubic yards per hour
in addition to that originally
de-

24
designed by the British
Engineer (viz 583,000 cubic
yards per hour) will be
pumped into the Zooda-
mooty, and which will
then place the supply on
the same basis, propor-
tionally to the cultivation,
as that of the Brasalar.

Instructions to the
above effect have ac-
cordingly been issued to
the Engineer, I. D.

Accept Sir, the assurance
of the high consideration
with which

I have the honor to be
Your Excellency's,
Most Obedt. Humble Servt.
