Dated 7 12	18/12.

Not to be folded or roughly handled

ST.

*Proceedings of the Madras Government, Public Works Department,
7th December 1868.*

Read the following letters:—

No. 168. From the Superintending Engineer, 7th Division, to the Secretary to Government, Public Works Department, dated Areacode, Ernaad Talook, Malabar District, 19th November 1868, No. 158.

I have the honor to inform you that a Gunner's Quadrant, modified and added to for tracing purposes, such as those referred to in G. O., No. 3,417, of 30th October, was sent to the late Mr. Moncrieff by Major Farewell sometime ago, to serve as a pattern from which to make up others in the Workshop. And I am not aware that it was ever returned to Major Farewell, though I understand that that Officer was informed that similar instruments could not be made up in the Workshop at Madras.

Referred to the Superintendent of the Public Works Stores and Workshops, with a view to his reporting what has become of the Gunner's Quadrant in question, and why a similar instrument cannot be made up in the Workshops.

(Signed) CHARLES A. ORR, Colonel, R. E.,
Secretary to Government, P.W.D.

FORT ST. GEORGE,
24th November 1868.

No. 169. From the Superintendent of Public Works Workshop and Stores, to the Secretary to Government, Public Works Department, dated Chepauk, 26th November 1868, No. 1,354.

1. With reference to the Order of Government, dated 24th instant, I have the honor to report that the Gunner's Quadrant alluded to in Colonel Walker's letter, communicated therewith, was returned to Major Farewell on the 4th September last.

2. The correspondence on this subject appears to have been conducted demi-officially, as nothing appears on the records of this Office, save the letter intimating return of the instrument.

3. Quadrants, with the improvements suggested by the Superintending Engineer, could be made up in the Workshop, if dividing machines were at hand.

1 Machine, Circular, dividing.
1 Do. Straight line.

* G. O., 19th October 1867, No. 3,250.

4. In the annual Indent on the Home Government for 1867, two dividing machines were included, and the Right Honorable the Secretary of State for India, in his* Despatch, dated 14th

September 1867, intimated that he had approved of the supply of the machines, and directed their provision at an early date; but up to date of the last bi-monthly

20th October 1868.

Return of Stores under provision, these machines appear not to have been contracted for, while nearly all the stores applied for on that Indent have been received, and subsequent requisitions partially supplied.

5. The Government having fully recognized the need of dividing machines to render the Workshop efficient, I beg respectfully to solicit that they will be pleased to draw the attention of the Home authorities to the time that has elapsed since the requisition was forwarded, and to urge their speedy despatch.

Proceedings of the Madras Government, Public Works Department,
7th December 1868.

No. 170.

ORDER THEREON, 7th December 1868, No. 3,821.

ACCOUNT, No. 12.

1. The foregoing letter from the Superintendent of the Public Works Stores and Workshops will be communicated to the Superintending Engineer of the 7th Division, with a view to his requesting Major Farewell to be good enough to send back to the Public Works Stores the Gunner's Quadrant returned to him on the 7th September last.

2. The Home Government will be addressed regarding the early despatch to this country of the dividing machines referred to by Mr. Grainger.

Sir
With reference to the Order of Government dated 24th instant, I have the honor to report that the Spinner's Quadrant alluded to in Colonel Walker's letter, communicated therewith, was returned to Major Farewell on the 4th September last.

The correspondence on this subject appears to have been conducted in a private manner, as nothing appears on the records of this Office, save the letter intimating return of the instrument. Quadrants with the improvements suggested by the Superintending Engineer, could be made up in the Workshop, if Dividing Machines were at hand. In the Annual Report on the
