*Proceedings of the Madras Government, Public Works Department,
10th December 1868.*

No. 225. Read the following letter from the Superintending Engineer, 6th Division, to the Secretary to Government, Public Works Department, dated Tanjore, 12th November 1868, No. 848 :—

I have the honor to inform you that it has been found that the establishment sanctioned in G. O., No. 292, dated 30th January 1867, for the conservancy of the

Ponairy channel and its branches has not answered its purpose in one most important particular, viz., in the prevention of injury to the channels by the formation of earthen embankments across the main and branch channels, this is due to the fact that at the very time the Monigar is employed in forming the temporary bank in the river bed to divert the water to the head of the channel, the water in the channel is at its lowest, and it is then that the regulation of the supply to the branches is most urgently required, and, in the absence of the Monigar at the head of the channel, the people form dams across the channel, and prevent water from passing to the more eastern branches. I propose, therefore, to appoint a Monigar on Rupees 15 per mensem for the purpose of regulating the distribution in lieu of the three Watchmen in the present establishment. These men have been found to be useless as regards the check of the malpractices adverted to, and when the river and channels are in flood the services of members of the establishment noted in the margin may be

2 Maistries.

28 Coolies.

G. O., No. 3,569, 20th November 1867.

availed of as watchers, as they are not then required to divert water from the river to the head of the main channel.

2. A Statement showing the change proposed in the establishment is enclosed.

SIXTH DIVISION.
Tabular Statement of proposed Establishment for the conservancy of Ponairi channel in the Trichinopoly District.

Enclosure. 1 Sir,

I have the honor to inform you that it has been found that the Establishment sanctioned No 51. in G.O. N^o 292 dated 30th January 1867 for the conservancy of the Pondary Channel and its branches has not answered its purpose in one most important particular viz. in the prevention of injury to the channels, by the formation of earthen embankments across the main and branch channels, this is due to the fact that at the very time the Monigar is employed in forming the temporary bank in the River bed to divert the water to the head of the channel, the water in the channel is at its lowest and it is then that the regulation of the supply to the Branches is most urgently required and in the absence of the Monigar at the head of the channel the people form dams across the channel and prevent water from passing to the more eastern branches. I propose therefore

To appoint a Monigan on Rs 15 per Mensem for the purpose of regulating the distribution in lieu of the 3 Watchmen in the present Establishment. These men have been found to be useless as regards the check of the Malpractices adverted to and when the River and channels are in flood the services of Members of the Establishment noted in the Margin may be availed of as Watchmen as they are not then required to divert water from the River to the head of the Main channel.
