*Proceedings of the Madras Government, Revenue Department,
19th February 1868.*

Read the following papers:—

No. 409. Proceedings of the Board of Revenue, dated 30th January 1868,
No. 773.

Read the following letter from the Deputy Collector in charge of Treasury, Bellary,
to the Collector of Bellary, dated 9th January 1868, No. 38:—

I have the honor to submit, for favorable consideration, the accompanying
Arzi from the Tahsildar of Huvinhudgally, who, representing the recovery of
twenty fever patients by administering Chlorodyne, applies for five bottles of that
medicine, which, if they cannot be purchased at Government cost, he requests may
be supplied at his own private cost. He states that fever is very prevalent in his
talook, and proposes administering the medicine himself, with the aid of his
Serishtadar and Revenue Inspectors.

Forwarded to the Board of Revenue, with request that the medicine may be
supplied, if procurable.

As only a small quantity (7 lbs. 2 oz.) of English Chlorodyne is available at
the Presidency Medical Stores for issue to Collectors, the Acting Collector is
requested to state why the application of the Tahsildar cannot be met from the
supply (2 lbs.) ordered to be furnished to him in Board's Proceedings, dated 15th
October 1867, No. 752, for distribution gratis to the poorer classes of his district.

No. 410. Proceedings of the Board of Revenue, dated 17th February 1868.

Read again letter from the Collector of Bellary, dated 9th January 1868, recorded
in Board's Proceedings, dated 30th January 1868, No. 773.

Read also the following letter from the Collector of Bellary, to the Secretary to the
Board of Revenue, dated Bellary, 4th February 1868.

1. In reply to the Proceedings of the Board of Revenue, dated 30th January
1868, requesting to be informed why the application of the Tahsildar of Huvin-
hudgally cannot be met from the supply of Chlorodyne furnished to this district,
I have the honor to state that the quantity received was distributed to each talook,
fever being generally prevalent; but that the disease being more virulent and fatal
in the talook referred to, the quantity is insufficient to meet the demand.

2. It appears to me that large wholesale importation of this useful medicine,
is advisable for the preservation
