*Proceedings of the Madras Government, Public Works Department,
11th March 1868.*

No. 257. Read the following letter from the Superintending Engineer, 1st Division, to the Chief Engineer and Joint Secretary to Government, Public Works Department, dated Camp at Dowlaishweram, 28th February 1868, No. 268:—

- 1 Sketch.
- 1 Plan.
- 1 Abstract Estimate.
- 1 Specification.
- * Amounting to Rupees 812.

1. I have the honor to submit an estimate,* with plan and sketch, for the construction of a dam to divide the irrigation water, drawn from the Mundapetta canal by a sluice immediately

above the Thapeswaram lock, between two principal branch channels, one of which (the Vadurupaka channel) has a more rapid fall than the other.

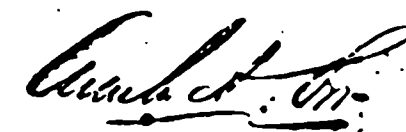

2. The head sluice has two vents, each one square yard, with their sills flush with the upper sill of the Thapeswaram lock; the crests of the dividing dam will be fixed at 1 foot 4 inches above the lock upper sill; with 8 feet 3 inches on the Dowlaishweram head sluice floor, we can reckon upon having 4 feet 9 inches on the Thapeswaram lock upper sill, in which state of the water supply the delivery by the two channels will be about 18,000 cubic yards per hour, of which 14,400 would flow down the Vadurupaka channel and 3,600 down the side channel. The areas of land dependent on the two channels being 7,620 acres and 1,880 acres, respectively.

No. 258. *Sanctioned*, 11th March 1868, No. 817.

IRRIGATION, No. 8.

Sanctioned.
