*Proceedings of the Madras Government, Public Works Department,
14th January 1869.*

No. 216

Dated 14th January 1869, No. 105.

IRRIGATION, No. 17.

1. On the 20th February 1866, Mr. Fraser was called upon by an Order in this Department to report in what state of progress when he was transferred from the Coimbatore District he had left the investigations which had been entrusted to him for ascertaining the means of storing water which existed in the upper basin of the Cauvery and its tributaries, and on the 11th June following he submitted a Memorandum, towards the conclusion of which he stated that he had been able to put together the whole of the original draft of his first report, in which all the sites he had examined for reservoirs, and the rivers are described, and sketch sections in the lines of the proposed bunds are given, adding, that should the Government desire to have this report, he would have it copied and sent in.

2. Although in the orders passed on that Memorandum Mr. Fraser was desired at once to forward to Government all the papers, plans, and surveys connected with the proposed reservoirs on the Cauvery, no notice has yet been taken by him of that requisition, and, as further delay cannot be permitted, His Excellency the Governor in Council resolves to desire that they may be delivered up immediately in whatever state they may happen to be.
