*Proceedings of the Madras Government, Public Works Department,
5th February 1870.*

No. 100. Read the following letter from the Superintending Engineer, 7th Division, to the Secretary to Government, Public Works Department, dated Coonoor, 22nd January 1870, No. 172:—

I HAVE the honour to forward an original letter * from the Executive Engineer in charge of Neilgherry Range, and to request that under the circumstances recorded therein the sanction of Government may be accorded to writing off to "Profit and Loss," on account of lime stone stock, of Rupees 1,090-6-2.

* No. 193 of 4th January 1870.

From the Executive Engineer, Neilgherries, to the Superintending Engineer, 7th Division, dated Ootacamund, 4th January 1870, No. 193.

I HAVE the honour to bring to your notice that, on measuring up the lime stone in hand at Wellington, it is found that instead of there being 958 paraes in hand only 473 paraes remain.

2. The balance against lime stone, as shown in the stock account, is Rupees 2,154-10-2, while the lime stone in hand at Rupees 2-4-0 per parah amounts to only Rupees 1,064-4-0, leaving a loss of Rupees 1,090-6-2, which I request that application to Government may be made to allow of the amount being written off to "Profit and Loss." The lime stone is the remains of a very large supply left on the completion of the barrack works, and having been in large heaps for years past was always measured cubically; but the remaining quantity being small, on actual parah measurement, the deficiency reported is found. Over several thousand measured paraes this deficiency is very likely to arise either by over-issue of very small quantities or is attributable to wastage, so small at each issue as not to be observable over so large a stock as that originally in hand in 1857-58, viz., paraes 67,575½.

No. 101. ORDER THEREON, 5th February 1870, No. 427.

ACCOUNT, No. 12.

It appears from these papers that on measuring up the lime stone remaining in stock on the books of the Neilgherry Range from the supply laid in for the construction of the Military buildings at Wellington, there was found to be a deficiency of 485 paraes. As the quantity collected in 1857-58 amounted to 67,575 paraes, the deficiency now brought to notice is not excessive† and may, in the opinion of Government, be accounted for in the manner explained by the Executive Engineer. His Excellency the Governor in Council therefore resolves to sanction its value, Rupees 1,090-6-2, to be written off to "Profit and Loss."

† Considerably under one per cent.
