*Proceedings of the Madras Government, Public Works Department,
12th December 1870.*

No. 225. Read the following letter from the Acting Superintending Engineer, 5th Division, to the Secretary to Government, Public Works Department, dated Cuddalore, 25th November 1870, No. 183 :—

In reference to G. O., No. 66, of the 12th November 1870, I have the honour to state that the Executive Engineer, Bangalore, has reported to me that the estimates and plans of the Drinking Water Scheme from the Dhobies' Wells at the Ulsoor Tank and the Ulsoor Water Project are in a forward state, and will be submitted very shortly.

No. 226. ORDER THEREON, 12th December 1870, No. 3,005.

MILITARY WORKS, No. 13.

It having been found that the water of the Ulsoor Tank is not fit for drinking or culinary purposes even after being carefully filtered, and it having been decided that all water required for these purposes should be drawn from the Dhobies' Wells, the Ulsoor Water Works Project will have to be greatly modified to meet the change, and as the detailed works of distribution intended to be provided for in that project will now require to be included in that for obtaining pure water from the Dhobies' Wells, the Government are of opinion that, regarding the delivery to the troops of water for all purposes as the object to be effected, it will be advisable to treat the two projects as forming but one work.

2. The Acting Superintending Engineer will accordingly take measures for the early submission of the necessary plans and estimates. These should be prepared in conformity with the views of Government as recorded in Proceedings No. 1,278, of 18th May 1870, and No. 2,152, of 8th September last, and should be framed on the most economical basis.
