*Proceedings of the Madras Government, Revenue Department,
6th January 1871.*

No. 64. Read the following endorsement of the Inspector-General, Indian Medical Department, dated Fort Saint George, 21st December 1870, No. 322 :—

Read the following letter from Senior Apothecary R. HUFFTON, in medical charge Chetterpore, to the Deputy-Inspector-General, Indian Medical Department, Presidency and Northern Districts, dated Chetterpore, 7th December 1870, No. 73.

I BEG respectfully to report, for your information, that fever has been on the increase in the Ganjam fever hospital during the past month. The total treated was 184 against 150 during October. None of the cases were serious, and yielded readily to treatment. This increase probably has arisen from the setting in of the cold season and the increased moisture in the air from the abundant monsoon this year. No fatal cases occurred among those brought under European treatment, although the Curnum's report for and around Ganjam show a mortality of twenty-four case, sixteen of which are said to have died from fever.

Weekly Report of Fever-cases among the Civil population of Ganjam, from Monday the 23th November to Sunday the 4th December 1870.

To

The Deputy Inspector General
Indian Medical Department
Presidency & Northern Districts

Sir

I beg respectfully to report for your information
that, fever has been on the increase
in the Gungam fever hospital during
the past month. The total treated was
184, against 150, during October. None
of the cases were serious and all died
readily to treatment. This increase
probably has arisen from the setting
in of the cold season, and the increased
moisture in the air, from the abundant
monsoon this year. No fatal cases
occurred, among those brought under
European treatment, at the the barman's
report for, and around Gungam, there
is an mortality of 24 cases, 16 of which
are said to have died from fever.

I have the honor to be
