ESTABLISHMENT, No. 24.

As THE Government of India have struck two lacs of rupees off the provision for establishments in the Public Works Budget of 1870-71, it has become absolutely necessary to make reductions to that amount, and as this cannot be effected without dispensing with the services of some of the members of the Engineer grades, His Excellency the Governor in Council has been reluctantly compelled to re-place the services of the gentlemen named in the margin at the disposal of the Government of India, and they will accordingly proceed to Calcutta by an early opportunity and there report themselves at the office of the Secretary to Government in the Public Works Department.

These gentlemen have all performed the duties entrusted to them since their arrival in India to the entire satisfaction of the Government, and His Excellency the Governor in Council, while he cannot but regret that this Presidency is to be deprived of their services, hopes that, in the wider field of employment on which they are about to enter, their prospects will be such as to compensate for the present inconvenience to which they must unavoidably be put to meet the exigencies of the service.
