G.O. No. 2526	Press
375-26	Mis.
Dated 22/10	18/10.

Not to be folded or roughly handled

*Proceedings of the Madras Government, Public Works Department,
22nd October 1870.*

No. 325. Read the following letter from the Executive Engineer in charge of 6th Division to the Secretary to Government, Public Works Department, dated Tanjore, 1st October 1870, No. 563.—

I HAVE the honour to report that on the 23rd August last the Superintending Engineer addressed the Acting Brigade Major, Southern District, saying that of the allotment of the current year for Minor New Works, Military, there was a balance of Rupees 772 unappropriated, and in order to utilize the sum available it was suggested that the Brigadier Commanding the Southern District should select, from a list furnished from this office on the 2nd idem, the works on which he would wish the Rupees 772 to be expended, and accordingly the following works were selected as the most important —

Flooring the Laboratory in the Ordnance Stores at Trichi-	RS.
nopoly with asphalte	230

For constructing one Marker's and the Stop Butts for the Rifle Range	385
--	-----

3. Both these works were included in the list forwarded to Government with letter No 88, dated 25th April last, and for want of funds they were not sanctioned. The butts for the Rifle Range were commenced last year, and a balance of Rupees 585 were required from the reserve for completing it this year; but as funds are not available, and moreover, as the estimate consists of several items, it has been arranged for dispensing for the present with one of the Marker's butts, hence only Rupees 385 is entered opposite the work, instead of Rupees 585, the balance of the estimate.

4 In addition to the above, I beg to submit an abstract estimate of Rupees 120 for shutting up the ventilating ridge of the Commissariat Store-rooms with country wood planks to prevent cats and monkeys from entering into the stores; the work has received the approval of His Excellency the Commander-in-Chief, and
