Proceedings of the Madras Government, Public Works Department, 19th January 1871.

No. 313. Read the following Memorandum from the Assistant Secretary to the Government of India, Public Works Department, (Railway,) to the Secretary to the Government of Madras, Public Works Department, (Railway,) dated Fort William, 5th December 1870, No. 1,930-R. :—

THE undersigned is directed to forward, for information, the accompanying extract from a letter from the Locomotive Superintendent to the Chief Engineer of the East Indian Railway, No. 5,265-1,740-A., dated the 21st October 1870, relating to the satisfactory results that have attended the use of "Riley's Composition" for preventing the incrustation of engine boilers.

(Signed) KELLOW C. PYE,
Assistant Secretary to the Government of India.

No. 314. ORDER THEREON, 19th January 1871, No. 149.

RAILWAY, No. 36.

COMMUNICATED to the Consulting Engineer for Railways.

(True Extract.)

Extract from a letter from the Locomotive Supt^s, East-Indian Railway, to the Chief Engineer and Member of Agency No. 5265/1740 dated 21st October 1870.

I have much pleasure in recording my testimony to the satisfactory results that have been obtained by the general use of Riley's composition for preventing the incrustation of boilers. — The composition not only prevents incrustation but gradually removes old scales which I consider great advantages. 45£ per ton, the cost at which the article will be delivered in Calcutta does appear a long price when taken over the bulk, but in the way I use it, viz:, for which the cost does not exceed six pence per Boiler, on each occasion, and this is very little when compared with the results. —

All communications should be addressed to the Secretary.
