MADRAS RECORD OFFICE.**Government of Madras.****Public Works DEPARTMENT.**

G.O. No.	Press
65-86	Mis.
Dated	18 7/.

Not to be folded or roughly handled

*Proceedings of the Madras Government, Public Works Department,
8th August 1871.*

No. 65. Read the following Endorsement of the Chief Engineer for Irrigation, dated Madras, 17th July 1871, No. 49. —

From the Agent and Manager of the Madras Irrigation and Canal Company, to the Chief Engineer for Irrigation, dated Madras, 14th June 1871, No. 260.

I HAVE the honour to inform you that the Chief Engineer proposes, as soon after the 1st proximo as may be, to detail Mr. Browning on the special duty of investigating and reporting upon the general question of the calingulahs, and preparing a scheme for the improvement of these structures.

2. I advise you of the fact because Mr. Browning will not be attached to any particular division, and I am desirous to obviate any difficulty that might arise about passing his salary.

3. I propose that Mr. Browning's name be inserted in the Acquittance Roll of such division as he may in the course of his duties happen to be in at the proper period for payment of salaries.

From the Agent and Manager of the Madras Irrigation and Canal Company, to the Chief Engineer for Irrigation, dated Madras, 23rd June 1871, No. 274.

I HAVE the honour to acknowledge receipt of your letter, No. 65, of the 20th instant, received this morning

2. Although the present staff is sanctioned only until the 30th instant, and actual construction work on the present section of the Company's canal will cease on that date, it does not follow that the services of the staff, as a whole, can be dispensed with simultaneously with the completion of construction. Much will remain to be done after that day in the way of final measurements, adjustment of accounts, and settlement with contractors and others, and this can be done only by those who have had charge of construction operations

3. Extensive reductions have already been made in the staff, every man not absolutely required having been dismissed, or being now under notice to leave on an early day, but with a view to the adjustment operations to which I have referred, I shall be glad if you will obtain sanction for the retention of the staff as it now stands on construction for a limited period, say three months from the 30th instant. The services of each man will be dispensed with as he ceases to be required, and probably long before the expiration of the three months the construction staff will have ceased to exist, such members of it as are required being gradually drafted into the maintenance staff.

4. Should this arrangement be sanctioned Mr. Browning will be included in it, and a separate and special application in his case will not be required. In the event of the special duty upon which it is proposed to employ Mr. Browning not being completed at the expiration of three months, sanction can then be asked for the retention of his services upon Construction for a further fixed period. With regard to the rate per mensem, Mr. Browning's agreement with the Company, which will terminate on the 8th November 1871, is at the rate of Rupees 800 per mensem salary, and 150, allowance

5. In the case of my own establishment, reductions to a greater extent than the condition of the business will justify have been made, and it will be still further reduced as the work diminishes, but at present there is full employment for the staff as it stands. The accounts for June will not be ready for the Government Examiner until towards the latter part of August, and the half-yearly accounts and general adjustment of expenditure will occupy another month or more.

6. I must, therefore, ask for sanction for the retention of my staff on Construction Account for at least three months, from the 30th June next. On that date, or so soon thereafter as the accounts, etc., on construction shall be completed, such members of the staff as are

*names be inserted in the Acquittance
Roll of such Division as he may in the
course*

*Proceedings of the Madras Government, Public Works Department,
8th August 1871.*

required for revenue work will be formed into a Revenue Establishment, and the remainder will be dismissed.

From the Agent and Manager of the Madras Irrigation and Canal Company, to the Chief Engineer for Irrigation, dated Madras, 3rd July 1871, No 289.

In reply to your letter, No. 68, of the 27th ultimo (received this morning), I have the honour to inform you that the pay of the Construction Establishment, proposed to be maintained for a period after the 1st instant, will be met from the available balance of Construction Funds

From the Agent and Manager of the Madras Irrigation and Canal Company, to the Under Secretary to Government, Public Works Department, dated Madras, 14th July 1871, No 307.

In reply to your letter, No 71, of the 7th instant, I have the honour to hand you a detailed statement of the establishments which I propose for sanction for a limited period, from the 1st instant, chargeable to Construction.

2. It is impossible for me to give the exact period in the case of each individual, as it would involve a closer calculation of the amount of work to be done by each man in the minutes particular than it is in the power of any one to make. I hope the Construction Accounts will be closed, as far as they can at present be closed, within three months, but in winding up accounts so heavy and which have been running so many years, difficulties and consequent delay which cannot be foreseen or specified may be expected to arise, and these can only be dealt with by those who are familiar with, and understand, the accounts.

Many of the men whose names are reported in my list are already under notice to leave the service, or are in course of transfer to Conservancy, and not one man will be retained longer than is absolutely necessary.

3. What I desire is to have the reduced staff, the particulars of which accompany this letter sanctioned for three months from 1st instant, and as each individual completes his service upon which he is engaged his services will be dispensed with, or he will be transferred, as the case may require.

4. In this way I hope that at the expiration of the three months, for which sanction is asked, the Construction staff will have ceased to exist.

5. As occasion may arise in the divisions for the employment of a stronger staff than the very limited one I have put down, I would ask for sanction to employ a contingent staff at a limited cost, say to the extent of Rupees 200 per mensem, should urgent necessity occur.

Summary of Staff proposed for sanction for three months from 1st July 1871, chargeable to Capital.

SUBMITTED for the orders of Government.

The Order of Government marginally noted accords sanction to a scale of establishment amounting to Rupees 28,294 per mensem. As under the

terms of their contract the Irrigation Company were to have fully completed the canal and works by the 30th ultimo, it is manifest that the employment of a "Construction Staff" after that date was never contemplated, and that the consideration of the question rests on entirely a new basis.

The monthly charge for the staff now proposed by the Agent and Manager amounts to Rupees 10,788, and the whole debit against the Capital Account, supposing it to be retained for three months, would be Rupees 32,364.

*Proceedings of the Madras Government, Public Works Department,
18th August 1871.*

2. There is no doubt that the reasons advanced by the Agent and Manager for the retention of staff other than that sanctioned for mere conservancy are cogent, and in addition to the duties assigned to them by the Agent in his letter of the 23rd June 1871, No. 274, they will really have that of completing the works, which, as noted in my report to Government, dated the 6th July 1871, are in a number of instances not in so finished a state as they might be.

3. The case of Mr. Browning differs from that of other members of the staff proposed to be retained. It will be seen from the Agent's letter of the 14th June 1871, No. 260, that the Chief Engineer proposes that Mr. Browning should be employed in investigating the question of the requirement of the canal in the shape of additional works for the discharge of surplus water. The construction of such works, it will be recollected, was approved of by Government in their G. O., No. 1,089, of the 18th April 1871.

4. The cost of the staff detailed in the statement forwarded herewith will, the Agent reports, be met from the available balance of Construction Funds, and as there seems to be no chance of any satisfactory winding up of the Construction Accounts of the Company unless it is retained, and the Agent promises to use every exertion to complete the work and to discharge each member as he finishes his task, I see no alternative but to recommend that the proposal as brought forward be sanctioned so far as regards the numbers entered in the list, but I cannot see how any necessity can arise for the employment in addition of the contingent staff referred to in the last paragraph of the Agent's letter accompanying that list.

(Signed) A. deC. SCOTT, Captain, R.E.,
Under Secretary to Government,
for Chief Engineer for Irrigation.

No. 66. ORDER THEREON, 8th August 1871, No. 2,041.

IRRIGATION, No. 4.

His Excellency the Governor in Council sanctions the scale of Engineering and Office Establishments for the Madras Irrigation and Canal Company proposed to be retained for three months from the 1st July 1871, at a monthly cost of Rupees 10,788, to meet which it is stated that there are sufficient funds remaining from Capital.

(True Extract.)

(Signed) A. deC. SCOTT, Captain, R. E.,
Under Secretary to Government.

To the Chief Engineer for Irrigation.
" Agent and Manager of the Madras Irrigation and Canal Company.

D. P. M.

Sir,

In reply to your letter N^o 71 of the 7th Instant I have the honor to hand you a detailed Statement of the Establishments which I propose for sanction for a limited period from the 1st Instant chargeable to Construction.

It is impossible for me to give the exact period in the case of each individual as it would involve a closer calculation of the amount of work to be done by each man in the minutest particular than it is in the power of any one to make. I hope the Construction Accounts will be closed, as far as they can at present be closed, within three months but in winding up accounts so heavy and which have been running so many years difficulties and consequent delay which cannot be foreseen or specified may be expected to arise and these can only be dealt with by those who are familiar with, and understand the Accounts.

Many of the men whose names are indicated in my List are already under notice to leave the service, or are in course of transfer to Conservancy

and not one man will be retained longer than is absolutely necessary.

What I desire is to have the reduced staff, the particulars of which accompany this letter, sanctioned for three months from 1st Instant and as each individual completes the particular work upon which he is engaged his services will be dispensed with or he will be transferred to Con. service as the case may require.

In this way I hope that at the expiration of the three months for which sanction is asked the Construction Staff will have ceased to exist.

As occasion may arise in the divisions for the employment of a stronger staff than the very limited one I have put down, I would ask for sanction to employ a Contingent Staff at a limited cost say to the extent of Rs 200 should a urgent necessity occur.

No 9.

From the Agent and Manager, Madras Irrigation and Canal Company.
No 232 of the 14th June 1871 - Requesting sanction for the employment of Mr. Browning on special duty after the 1st July 1871.
No 274 of the 23rd June 1871 - requesting to be allowed to retain Staff on Construction for three months after the 30th June.
No 282 of the 3rd July 1871. Stating that the Construction proposed to be retained will be paid from the available balance of the Construction Fund.
No 307 of the 14th July 1871 - Forwarding a detailed statement of the Construction Staff proposed to be retained, including Mr. Browning.
Submitted for the orders of Government.

The order of Government marginally noted - accords sanction to a scale of 10 establishments - amounting to Rs. 20,240 per annum - and sanctioned the terms of their

28 September 1870
No 2343.

Contract the Irrigation Company were to have fully completed the Canal and works by the 30th ultimo. It is manifest that the employment of a "Construction Staff" after that date was never contemplated and that the consideration of the question rests on entirely a new basis.

The monthly charge for the Staff now proposed by the Agent and Manager amounts to Rs 10738-0-0 and the whole debit against the Capital Account supposing it to be retained for three months would be Rs 32214-0-0.

2. There is no doubt that the reasons advanced by the Agent and Manager for the retention of Staff other than that sanctioned for mere continuance are cogent and in addition to the duties assigned to them by the Agent in his letter of the 23rd June 1877 No 274 they will really have that of completing the works which as noted in my report to Government dated the 6th July 1877 are in a number of instances not

in so finished a state as they might be. The rate of the Engineering differs from that of other members of the Staff proposed to be retained. It will be seen from the Agent's letter of the 14th June 1871 No 260 that the Chief Engineer proposes that the Engineering should be employed in investigating the execution of the requirement of the Canal in the shape of additional works for the discharge of surplus water. The construction of such works if with the fee collected was approved of by Government in their G.O. No 1009 of the 18th April 1871. 4. The cost of the Staff detailed in the statement forwarded herewith. Still, the Agent reports, he met from the available balance of Construction funds and there seems to be no chance of any satisfactory winding up of the Construction accounts of the Company. Under these circumstances and the Agent's promises to use every exertion for completing the work and to discharge each member as he finishes

his task. I see no alternative but to recommend that the proposals be sent forward as sanctioned in the list. But I cannot see how any necessity can arise for the employment in addition of the Contingent Staff referred to in the last paragraph of the Agents letter accompanying that list.

Public Works Department

Letter from the Under Secretary to
Government for Chief Eng for Irrigation
Dated 17th July 1871

Circulated for orders

Mr. Cardendale states that
the proposed for the
Agents office is too large
as he does not make any
specific proposal for
reduction. I suppose
therefore in much
sanction the whole
scheme for 3 months

The establishment
proposed for the Agents
Office in Madras
appears to me very
large for the work that
they will have to do.
All the other changes
appear necessary, and
as it is stated that
there are sufficient
funds remaining
from Capital to
cover the expense, I
think it would be
