Dated 20—9— 18 71.

Not to be folded or roughly handled

No. 312. Read the following Endorsement of the Acting Superintending Engineer, 7th Division, dated Camp at Erode, 29th August 1871, No. 105.—

From the Executive Engineer, Neilgherries, to the Acting Superintending Engineer, 7th Division, dated Ootacamund, 23rd August 1871, No. 132.

With great regret I have to report the death of cooly Kurriah, who was killed on the 17th instant.

2. On the 16th instant he loaded and fired ten holes in the rocks at the Kandal sluice. One hole missed fire. On the 17th he set to work in the usual manner to take out the charge from this hole. After working for about half an hour, a portion of the charge exploded, which killed the cooly on the spot. This man had been employed in exploding rock-holes for some years, and knew his work well. He is a great loss to the works. On this occasion he seems to have used all the needful precautions. He was using a copper spoon which was bent by the explosion; he was pouring water into the hole as he withdrew the charge.

3. A copy of the Proceedings of the Court of Inquest held on the body is herewith sent.

4. Inquiries to ascertain the nearest of kin to the deceased are being instituted, and their result will be submitted to you in due course.

Submitted to Government for information. The usual application for gratuity will be forwarded as soon as it is received from Captain Morant.

FRENCH MEDICINES.

PREPARED BY

GRIMAULT AND Co.

CHEMISTS TO H I. H PRINCE NAPOLEON

PARIS

These different medicines represent the most recent medical discoveries, founded on the principles of Chemistry and therapeutics They must not be confounded with secret or quack medicines, as their names sufficiently indicate their composition; a circumstance which has caused them to be appreciated and prescribed by the faculty in the whole world. They widely differ from those numerous medicines advertised in the public papers as able to cure every possible disease, as they are applicable only to but a very few complaints The most stringent laws exist, in France, with regard to the sale of medical preparations, and only those, which have undergone an examination by the *Academy of Medicine*, and have been proved efficacious, either in the Hospitals, or in the practice of the first medical men, are authorised by the Government This fact must be a guarantee, for the excellence of Mess. GRIMAULT'S ET Co. medicines.
