Dated 7. 11. 1871.

Not to be folded or roughly handled

Proceedings of the Madras Government, Public Works Department, 7th November 1871.

No. 111. Read the following letter from the Superintending Engineer, 4th Division, to the Secretary to Government, Public Works Department, dated Madras, 26th October 1871, No. 3,028:—

I HAVE the honour to submit for sanction an estimate, amounting to Rupees 195, for providing teakwood frames for the iron doors of the sub-jail at Conjeveram, and to recommend that funds may be taken from the current year's grant of Rupees 400 for Civil Minor New Works under the head Provincial in the Chingleput District.

2. The work estimated for is considered by the Sub-Engineer in charge of No. 3 Range, Chingleput District, as emergent.

3. The present iron doors are hung on pegs fitted to granite blocks in the walls and over which are attic windows. The bearing down force of the doors and the constant jamming have seriously affected the security of the doors and attics, and the fittings have been quite shaken, and the attics are falling out. It is therefore proposed to hang the doors on strong wooden frames, as the walls of the building are already too much shaken.

No. 112. ORDER THEREON, 7th November 1871, No. 2,816.

CIVIL WORKS, No. 4. SANCTIONED.
