517-18	
Dated 25	2 1871.

Not to be folded or roughly handled*Copy*

*Proceedings of the Madras Government, Public Works Department,
25th February 1871.*

No. 517. Read the following Memorandum from the Chief Engineer for Irrigation, to the Secretary to Government, Public Works Department, dated Fort Saint George, 4th February 1871, No. 24 —

THE cement testing machine, of which a drawing taken from "Engineering," dated 23rd December 1870, page 465, is appended, appears to me likely to be of use in examining limes in connection with the preparation of concrete. The machine is simple, and I presume it would not be expensive, and I would recommend therefore that two be obtained on trial, and if found to answer others, by license from the patentee, might be made up in this country.

No. 518. ORDER THEREON, 25th February 1871, No. 554.

ACCOUNT, No. 53.

THE Government approve of the Chief Engineer's proposal to obtain two of the cement testing machines referred to in this memorandum on trial, and the General Superintendent of Public Works Stores and Workshops will be directed to include them in his next annual indent on the Home Government.

(True Extract.)

Colonel, R.E.,
Secretary to Government.

To the Chief Engineer for Irrigation.
,, General Superintendent of Public Works Stores and Workshops.
