*Proceedings of the Madras Government, Public Works Department,
3rd May 1872.*

No. 45. Read the following letter from the Assistant Secretary to the Government of India, Public Works Department, (Buildings and Roads—Military,) to the Secretary to the Government of Madras in the Public Works Department, dated Fort William, 4th April 1872, No. 469 B. M.:

In reply to your letter No. 529, dated 26th February 1872, submitting plans and estimates for completing the projects for the water-supply of the Bangalore Cantonment from the Ulsoor tank and Dhobies' wells projects, I am directed to state that it would appear from the correspondence now received that either of the projects might have sufficed to meet the requirements of the Cantonment, but as both projects are now so far advanced, His Excellency the Governor-General in Council is pleased to sanction the following outlay on the works, namely:—

Expenditure already incurred on the two projects	Rs. 2,22,902
Do. required to complete the Ulsoor scheme...	51,698
Do. required to complete the Dhobies' well scheme by connecting it with the other	24,098
Three lakhs, one thousand, six hundred and ninety-eight Rupees.	Total ... 3,01,698

2. I am also directed to suggest for consideration the following improvements and additions in connection with this project for water-supply:—

I.—It is thought that the cast-iron pillars supporting the iron tanks are weak, and that the horizontal bracing proposed should be supplemented by vertical and diagonal bracing, and that all the braces should be continuous, and not merely wrought-iron ties from pillar to pillar.

II.—The existing cistern at the Race Course Barracks contains nearly 12 days' supply, and at the Royal Horse Artillery Barracks the cistern contains 27 days' supply, while the cistern proposed for the Infantry Barracks will contain only a week's supply. It is thought that the capacity of the existing cisterns is over-large and that it might be well to reduce them to a week's supply each. It would also be well to cover all the cisterns in.

III.—The repair of a half filter at the Ulsoor works is strongly recommended by the Superintending Engineer, but the cost of its repair has not been included in the estimates submitted. A spare filter is evidently required, and these repairs should, it is thought, be carried out as soon as possible.

3. The sanction given in paragraph 1 has been registered in this office as No. 3 B. M. of 1872-73.

4. The original enclosures of your letter under reply are returned.

No. 46. ORDER THEREON, 3rd May 1872, No. 1,132.

MILITARY WORKS, No. 3.

COMMUNICATED to the Superintending Engineer of the 5th Division, with reference to G. O., No. 528, dated 26th

February 1872. The works may now be proceeded with, attention being given to the suggestions in paragraph 2.

(True Extract.)
