MADRAS RECORD OFFICE.

Government of Madras.

Public works DEPARTMENT.

G.O. No.	1315	Press
415-146		Mis.
Dated	14-5	1872

Not to be folded or roughly handled

No. 415.

Read the following:—

No. 513.

CIRCULAR MEMORANDUM.

WITH advertence to paragraph 2 of Board's Proceedings, dated 4th April 1872, No. 525, and generally to render the statistical information conveyed by the Returns accompanying the Annual Land Revenue Reports more complete, the accompanying three forms of statements are circulated as additional enclosures of Settlement Statement No. 3.

2. The first of them which will be known as enclosure D. in No. 3 shows the extent and assessment of *portions* of fields left waste, which are now included under "cultivation" whether the assessment thereof is remitted or charged at the annual settlement. This will enable the Board to distinguish the extent of "waste" which is exhibited in the accounts as "cultivated."

3. The second, which will be styled E. in No. 3, is devised to show the entire area brought under cultivation in any one particular fasli or season. At present this information is not completely afforded by Statement No. 3. The area of cultivation after the date of settlement, of cultivation of Porumboke lands, of cultivation of lands without durkhast, of cultivation concealed or not brought to account in the first instance, and of several similar items is now shown nowhere in the Settlement accounts, the revenue alone being brought to credit and exhibited in No. 5 Statement "Land Revenue, Miscellaneous."

4. The third, which will be called F. in No. 3, is intended to show in one view the whole of the area brought under irrigation, on which a charge is made for water supplied, whether in the shape of a water-rate per acre or as additional assessment or as charge for a second crop. At present no statement conveys this information. Columns have been also added in this form to show the extent of *free* irrigation in Zemindari and Inam villages. Where the charge for water is paid as part of peishcush as is the case with some Zemindaries, provision is made in this form for exhibiting the area irrigated in them.

5. Great care and accuracy will be necessary in filling up these forms, especially the last, as the information conveyed by it will be of great importance in judging of the general results of works of irrigation in the several districts of the Presidency.

6. The forms now circulated should be brought into use for the current Fasli 1281 (A.D. 1871-72), and should accompany the Settlement Report.

(By Order,)

MADRAS,
9th April 1872.

(Signed) J. GROSE,
Secretary.

Proceedings of the Madras Government.
