*Proceedings of the Madras Government, Public Works Department,
14th June 1872.*

No. 233. Read the following Proceedings of the Board of Revenue, dated 30th May 1872, No. 857 :—

From the Acting Collector of the Kistna District, to the Secretary to the Board of Revenue, dated Masulipatam, 1st May 1872, No. 1,325.

WITH reference to Board's Proceedings, dated 23rd November 1871, No. 4,833, I have the honour to report that the villagers of Chandrala in the Bezwada Taluq having denied any knowledge of work having been executed to the Mantri tank, the Head Assistant Collector was requested to inquire into the matter. This officer who has just submitted his report states that the villagers having admitted that the work was done to the tank, he directed them to pay the money at once, and believes it has been paid by this time.

2. Item 2 is a small balance of the amount of Rupees 2,428-1-7 expended in 1865-66 in the repairs of a tank in the Divi Division. The Tahsildar reports that he has issued strict instructions for the recovery of the amount, and I have also written to the General Deputy Collector in charge of the Bunder Taluq on the subject. I suppose that the delay is owing to small collections having had to be made from several individuals, some of whom are probably absent from the villages.

3. Adverting to the third item of Rupees 18, said to be due from the villagers of Mudenapally, for closing the breaches of Polrazucodu, I find that Mr. Boswell called upon the Superintending Engineer in June last, whether the provisions of Section 5, Act I. of 1858, were duly attended to before the closing of the breach was undertaken by the Engineering Department. To this no reply appears to have been received from this officer, and I have again addressed him. The villagers state that the breach was caused by the passage of Lambady cattle resorting to the Salt Kotars and general traffic.

SUBMITTED to Government, with reference to Government Order, Public Works Department, dated 2nd November 1871, No. 2,769.

2. Item 5 has probably been collected. Item 2 is very difficult to collect, but progress is being made. The disposal of Item 3 awaits the result of a reference from the Collector to the Superintending Engineer.
