12946	
Dated 11-11-18	18

Not to be folded or roughly handled

*Proceedings of the Madras Government, Public Works Department,
11th July 1872.*

No. 189. Read the following letter from the Consulting Architect to Government, to the Secretary to Government, Public Works Department, dated Madras, 28th June 1872, No. 87 :—

IN compliance with G. O., No. 3,105, dated the 8th December 1871, I have the honour to submit herewith the general specification, plans, and working drawings of a Sub-Collector's Cutcherry, and I beg to request that the same may be transmitted to the Superintending Engineer, 1st Division.

No 190. ORDER THEREON, 11th July 1872, No. 1,666.

CIVIL WORKS, No. 4.

ORDERED that copies of the general specification, plans, and working drawings of a Sub-Collector's Cutcherry received with this letter be furnished to the Superintending Engineers of the 1st, 2nd, 3rd, 4th, 5th, 6th, and 8th Divisions in continuation of G. O., No. 2,930, dated 20th November 1871.

(True Extract.)

Colonel, R.E.,

Secretary to Government.

To Superintending Engineers, 1st, 2nd, 3rd, 4th, 5th, 6th, and 8th Divisions.
,, R. F. Chisholm, Esq.
To the Board of Revenue.

Exd. S. T. Austin.

No 87

Consulting Architect Office
Madras 28 June 1872

From

R. F. Chisholm Esq. F.R.S.B. &
Consulting Architect to Government

To
Colonel G. W. Walker R.E.
Secretary to Government P.W.D.

Sir

In compliance with G. O. No 3105
dated the 3 December 1871. I have the honor
to submit herewith the General Specification
Plans and working drawings of a sub-
Collector's Cutchery and I beg to request
that the same may be transmitted to the
Superintending Engineer 1st Division.

I have the honor to be
Sir

Your most Obedt. Servant.

R. Chisholm

Consulting Architect to Government

Sub Collector's bungalow

Descriptive Specification

The foundation will be built according to the detailed drawing, but of such depth or depths as the Officer in charge of the work may direct.

The walls will be generally 18 inches thick with the exception of the face wall which will be 2 feet. This extra thickness is allowed as the wall is weakened by openings.

The walls will be of "pucca" masonry, and if possible the bricks should be exposed, and no plaster used externally.

The plinth will be 2 ft high.

The whole of the timber will be of Teak stem wrought & neatly framed. The ^{trusses} trusses should have a 2 in camber as directed in the detailed Specification for the Salug Bungalows.

The rafters of the porch should not be allowed to run into the wall.

at the building side but should rest upon, and be spliced to the plate as shown on the drawing. The spiral will be neatly turned on a brick center.

All the roofs should project well over the walls.

Where the porch leans against the building and the verandah roof against the tower, a lead or zinc gutter must be provided. wherever a roof butts against a wall, proper lead flashing should be inserted.

The roof should be tiled on teakwood rafters.

If the building is near the sea, all the door furniture should be of brass.

The interior should receive one coat of rough cast and be washed a light buff tint with white dressings.

All the details should be executed in strict accordance with the working drawings furnished and when the working drawings differ from the general plans, the former will always be accepted as correct.
