No. 371. Proceedings of the Madras Government in the Financial Department, dated 4th October 1872, No. 1,330.

From the President of the Municipal Commission, Cuddapah, to the Chief Secretary to Government, Fort St. George, dated Cavalamudgoo, 6th July 1872.

THE Municipal Commissioners of Cuddapah have asked me to apply to Government for the services of an experienced Engineer to examine and report upon the scheme for the supply of water to the town of Cuddapah from the Bugga springs.

2. I have the honour to request that the application may be complied with.

No. 196.

OFFICIAL MEMORANDUM.

THE President of the Municipal Commission is requested to furnish a Memorandum indicating the nature of the proposed work, and the amount of expenditure which is contemplated by the Commissioners.

(Signed) R. S. ELLIS,
Chief Secretary.

17*th July* 1872.

From the President of the Municipal Commission, Cuddapah, to the Chief Secretary to Government, Public Department, Fort St. George, dated Cuddapah, 21st September 1872, No. 73.

WITH reference to Official Memorandum No. 196, dated 17th July 1872, I have the honour to inform you that the Municipal Commissioners of Cuddapah have under consideration two plans for bringing fresh water into the town from the Bugga springs. The first is, by throwing up a masonry anicut with rough stone apron and retaining wall across the Bugga river, constructing a reservoir for storing water, excavating a supply-channel from the Bugga river to the reservoir and conducting the water from thence to the town by means of iron pipes, and erecting the necessary works for distributing the same; second, by constructing a cistern close to the existing Bugga springs, bringing the water from thence into the town through iron pipes, with other suitable works to supply the town. The Commissioners desire that these two proposals be submitted to Government with a request that an experienced Engineer may be sent up to examine and test the capabilities of the Bugga springs during the hot weather, and give his opinion as to which of the above plans will be the most economical and successful. The Commissioners further beg to state that they are, in the absence of proper data, unable to give the probable cost of the scheme.

TRANSFERRED to the Public Works Department in view to the necessary instructions being issued on the subject to the Executive Engineer of the division.

(True Extract.)
(Signed) C. A. GALTON,
Acting Under Secretary.

cistern close to the existing Bugga Spr

Proceedings of the Madras Government, Public Works Department, 23rd November 1872.

No. 372. From the Superintending Engineer, 3rd Division, to the Secretary to Government, Public Works Department, dated Bellary, 28th October 1872, No. 1,707.

In reply to the latter portion of G. O. No. 20, dated 3rd September 1872, I have the honour to inform you that I called upon the Officer in charge of Cuddapah Range to explain why he had not given assistance to the Local Fund Municipal Board in making a preliminary investigation of the project for bringing water from the springs of the Bugga river to Cuddapah town, referred to in G. O. No. 911, dated 23rd June 1871, Public Department, communicated in G. O. No. 40, dated 6th July 1871, Public Works Department.

2. Mr. Assistant Engineer Hunter in explanation states that he has not withheld when asked for his assistance and advice. Only on one occasion did the Commissioners speak to him on the subject about October of last year, and then he furnished the Vice-President with a rough estimate of the cost of bringing the water down to the town, framed on the very imperfect data at his disposal.

3. I addressed the Collector of Cuddapah on the subject on the 4th instant, and in his reply, which has just come to hand, he states that no active steps were taken in communication with Mr. Hunter, though the matter would be now taken up in consultation.

4. I have lately forwarded your Memorandum of the 17th October 1872, No. 158, to the Assistant Engineer, calling upon him to report upon two alternative schemes for supplying Cuddapah with water, and to state with reference thereto, in event of an establishment being required, whether the Municipality would bear the costs of its investigation.

5. It appears to me that Mr. Hunter has not hitherto taken the initiative in causing this project to be looked into, because his duties in his large range and his inadequate establishment for the work, prevented him making the investigation in the absence of any proposals from the Commissioners to augment his staff of subordinates.

No. 373. Order thereon, 23rd November 1872, No. 2,755.

CIVIL WORKS, No. 17.

The services of an experienced Engineer, Mr. Sage, will shortly be available for the charge of the Cuddapah District, and will doubtless also be availed of as a Member of the Cuddapah Municipal Commission. In the latter capacity he will in conformity with the principles laid down in G. O. No. 2,768 of 31st August 1866, afford the Commissioners every assistance in the investigation of the project for supplying the tank of Cuddapah with water, all expenses attendant on the inquiry being borne by the Municipal Funds, as agreed by the Commissioners in paragraph 5 of their President's letter No. 40 of 18th July 1872.
