Proceedings of the Madras Government, Public Works Department, 25th March 1872.

No. 551. Read the following letter from the Deputy Consulting Engineer for Railways, to the Secretary to Government, Public Works Department, dated Madras, 16th March 1872, No. 134 :—

With reference to paragraph 5 of the letter from the Government of India, G. O., No. 80, dated 11th January 1872. No. 2,676-R., dated 28th December 1871, I have the honour to explain that the item "less value of tools returned into stores" in Abstract A. of the Revenue Account of the Great Southern of India Railway for the half-year ended the 30th June 1871, represents the value of tools which being no longer required by the department to which they were originally issued are therefore returned into stock. The Agent writes that ordinarily such credits are deducted from the value of stores issued, and a separate entry does not appear; but during the half-year ending 30th June last, the value of tools and plant issued to the Maintenance Department being *less* than the value returned, this mode of adjustment could not be adopted.

No. 552. Order thereon, 25th March 1872, No. 828.

RAILWAY, No. 90.

Ordered that this letter be forwarded to the Government of India.

No. 553. Docket No. 829, dated 25th March 1872.
Copy of the above forwarded to the Government of India.

Sir,

In reply to your D.O. No 80 paragraph 5 of the letter from the Government of India, No 2676 R, dated 28th December 1891, I have the honour to explain that the items "Value of book returned" and "Loss" in Abstract A of the Revenue Account of the Great Southern of India Railway for the half year ended the 30th June 1891, represents the value of book

which being no longer required by the Departments to which they were originally issued are returned, this Board finds that there is sufficient reason that ordinary emoluments deducted from the value of stores issued and expended be charged for the half year ending 30th June last the value of books issued & charged to the maintenance Dr. part being less than the value returned, this mode of adjustment could not be adopted.
