Enclosures
Plans of
Irrigation
works damaged
(Sketch)

Sir,

I have the honor to report that three severe storms have visited the Neilgherry, Coimbatore and South East portion of the Malabar District during the first burst of the North East Monsoon in November, considerably damaging many Irrigation works and Bridges, &c.

1. On the Neilgherries after an unusually heavy fall of Rain flooding all the lower portion of the Station, the Range Officer noticed a very suspicious crack which showed itself in the Charliamund Embankment which sunk a good deal, and the swamp just below the Escape Weir evidently had moved and cracked and a subsidence was also found in the Escape Channel. The waste weir of the Ootacamund Lake has been much damaged, and the Ring bund in front of the new Sluice was apparently all but carried away - The small Bund below Newton

House

to the Local Fund Board for submission to Government.

b. In the Coimbatore District several Irrigation works are reported to have been injured, many requiring immediate repair to save the crops and loss of Revenue to the State. I enclose a Memorandum giving a list of the works in question, a precis of the damages sustained and probable amount of Estimate, showing funds allotted and those required to supplement the Imperial Agricultural Repair Allotment of the District. I have every reason to be satisfied with the steps taken by the Coimbatore Range Officer for the safety of the works of his Range; it was found necessary to prevent possible damage to the Railways Embankments to breach several Tanks and Channels, the points where they were breached appear to have been well selected and the cost of closing them is correspondingly light.

I have already issued orders to the Range Officers concerned to carry out such emergent works as are required to repair the damages that have occurred, and have allotted.

53
allotted the whole of the available Agricultural Repair funds at my disposal, to such works as appeared to be most important and Estimates have been received aggregating Rupees 9000 for which I request Government will be so good as to allot funds as the works are urgently required and some of them have already been taken in hand to prevent loss of Revenue. In my Telegram of the 4th Instant I asked for 7000 Rupees, but further Estimates have been received making up the total amount wanted under Imperial Agricultural Repairs to the amount now applied for.

8. In the Malabar District the Karingapully Bridge of 5 arches at the 5th mile on the Great Western Road from Calicut to Palghat is reported to have been destroyed on the night of the 15th November. The accompanying rough sketch received from the Palghat Range Officer shows the position of the Piers &c which have been overturned as shown by the arrows. The foundations of the Bridge will be examined by the Range Officer when the water in the River subsides and I will visit the work as early as possible and submit a further report.
