Colonel F. J. Moberly, R.E.
Superintending Engineer
2nd Division

To, Captain R. H. Dakes, R.E.
Acting Chief Engineer
for Irrigation.

Enclosed
1 plan
1 Estimate
2

I have the honor to submit a plan and estimate for constructing a protecting wall to the point between the Beguara Lock and the head sluice, amounting to Rupees 1460. The wall originally built was destroyed by the set of the stream. Major Mullins, on his late visit to the Kistna works, suggested that the revetted bank should be raised to 2 feet above flood level and the end rebuilt. The accompanying Estimate provides for these works but the return wall is proposed to be raised to the height of the masonry work generally i.e. 2 feet above the flood level.

L.O. No 722
March 17/82

As this work forms an improvement to the head works of the Kistna Ancient,

223
I would suggest that it may be ac-
-tioned from loan funds and allotment
granted from Imperial Budget item
32, "Commamore Channel."

I have the honor to be

Sir,
Your most Obedt. Servant

Alfred Colville

Supg Engineer D.D.W.

N^o. 213. P 3 12 5

Letter N^o. 82 of 9th October from
Superintending Engineer 2nd Division

There may be considerable scum along the point
 to be protected by the proposed wall and it
 has been deemed desirable to give the wall and
 its foundations a greater Section than was pro-
 vided in the Estimate forwarded by the Super-
 intending Engineer.

2. The alterations made in this office have
 raised the amount of the estimate from Rs. 1460
 to 1800 and as the work is one of restoration
 it may be provided for by the Superintending
 Engineer from the allotment for Agricultural
 Repairs at his disposal
