Not to be folded or roughly handled

No. 57. Read the following Endorsement of Lieutenant-Colonel J. MULLINS, R. E., Chief Engineer for Irrigation, dated Fort St. George, 4th April 1873, No. 1 :—

From C. A. BADHAM, Esq., Acting Manager of the Madras Irrigation and Canal Company, to Lieutenant-Colonel J. MULLINS, R. E., Chief Engineer for Irrigation, dated Madras, 31st March 1873, No. 71.

At the request of the Chief Engineer, I have the honour to hand you copy of a report drawn up and signed jointly by himself and Mr. W. H. G. Mills, an Engineer in the Hyderabad Public Works Department, giving the result of their investigation of the Company's claim for water supplied to the lands of Sultanpoor and Realampad in the Nizam's Territory, together with copy of a detailed statement of the amount due to the Company, also agreed to by those officers and bearing their signature.

2. I submit that this report is conclusive as to the validity of the Company's claim, and that there is no ground for the refusal to pay the water-rate.

3. I shall be glad to be furnished with a form E of this irrigation, in order that the amount, Rupees 1,632, may be included in our next Revenue statement.

Irrigation in His Highness the Nizam's Dominions. Settlement with Madras Irrigation and Canal Company for 1869-72.

In reference to His Excellency Sir Salar Jung's letter to the Resident of Hyderabad, No. 3,831 of 17th November 1871, the officer appointed by the Nizam's Government met the chief local officer of the Company on the 25th instant in order to determine, if possible, the question raised by His Excellency Sir Salar Jung, and generally to settle the assessment.

2. The question left by Sir Salar Jung for decision was whether the ryots were unwilling to carry on wet cultivation.

3. To begin with the settlement. The village officers raised no question about *the areas* cultivated, as they are given in the appended list prepared by the Company's Surveyor and the Curnum and Patell (or Head Reddthi) of the villages concerned; and every item of the list of fields entered (in that list) as irrigated in Sultanpoor in 1871, was readily recognized by the villagers.

4. As to the *harvesting of the crop*, no doubt nor denial was expressed in Sultanpoor. In Realampad no doubt but an absolute denial was expressed by the Patell, who said that not a

measure of rice had been obtained from this year's crop. But as the stubble of the rice fields proved the crop to have been cut, and the existence of fresh threshing floors corroborated the statement of the Company's Surveyor that the crop was within a few days of being ripe, and was in good condition when he measured it in December, and as no want of water was pleaded, but water was naturally running from the canal through the fields on the 26th March, it was impossible to consider the Patell's denial as anything but a lie.

5. As to *sufficiency of water supply*, no complaint was made.

6. As to the *reasonableness of the water-rate*. By Clause 13 of the Contract of the Secretary of State for India in Council with the Madras Irrigation and Canal Company, dated 3rd June 1863, in accordance with the special Act of Incorporation of 21 Victoria, dated 11th May 1858, the water-rate to be paid by cultivators is to be fixed by the Government of Madras and the Company, so as to represent, as nearly as circumstances will permit, "a fair charge for the water supplied."

7. In consequence of this engagement the Government of Madras, under the instructions of the Secretary of State for India, instituted extensive inquiries not only in districts already largely irrigated, but in the affected districts of Kurnool, Bellary, and Cuddapah, and at last in their Order No. 1,348 of 1st June 1866, fixed the present water-rate of Rupees 6 as a fair rate, and ordered such rate to be collected from cultivators using the water. This rate, fixed by the Madras Government, has been adopted in this settlement, and no reasonable objection to it was made by the villagers.

8. Lastly, as to the question of the *willingness of the ryots to irrigate*, there seemed no grounds for cancelling the right of the Company to be paid for the use of their water. The cultivators had made no complaint of their land being spoilt by water before sowing wet crop; no cases of dry crop spoilt by water were shown nor talked of. The wet crops had been carefully irrigated by channels cut by the cultivators, and led off from the nearest available supply on the Company's land, or from natural water-courses from which the canal water flows; and, lastly, when the Company by closing their sluices stinted to supply so as to leave only leakage available, the villagers opened the sluices surreptitiously at night. The statement of the villagers that the cultivation has been unwillingly carried on is absolutely refuted by a comparison of the different years. In Sultanpoor the wet cultivation (first crop) has varied between 26·28 acres in 1871, and 15·80 acres in 1869, and in Realampad between 55·18 acres in 1871, and 37·97 acres in 1872. It is, moreover, unreasonable to set aside the rate ordered by the Madras Government (as being a fair proportion of the increased profit realized by these ryots from wet crop), because the ryots allege that their land is rendered unfit for dry crop by the wetness of the ground caused by the canal. Had they been unwilling to sow paddy, the law can give no redress for mere sentiment. Had they been able to show that the rice crop is less lucrative than the dry crops, then they could fairly claim compensation from the Company for damaging their land by the leakage. But no such complaints were made, nor is it in accord with ordinary experience that the presence of the canal has depreciated the value of their land.

9. In settlement of the water-rate due from the ryots of Sultanpoor and Realampad to the Irrigation Company up to the season 1872-73 inclusive, the undersigned enclose detail lists in the usual form.

10. It was alleged by the Patell of Sultanpoor that some damage was caused by a breach of the canal in 1869; but no account of this damage was submitted for settlement. If the Tahsildar of Allumpoor have any such accounts, they ought to have been submitted at the time of settlement, and in case the omission to bring forward the accounts of damage arose from ignorance, it is suggested that the Tahsildar submit it to the officers appointed for the *next* settlement.

Proceedings of the Madras Government, Public Works Department,
5th May 1873.

11. The following is the total assessment for the villages named up to the present season inclusive, of which the details are shown on the accompanying sheets :—

Proceedings of the Madras Government, Public Works Department,
5th May 1873.

SUBMITTED to Government with a recommendation that arrangements be made for the remission to the Collector of Kurnool of the sums shown to be due for the past irrigation under the Madras Irrigation and Canal Company's Canal, of lands belonging to Hyderabad Territory. Similarly, for any irrigation that may be carried on in future years, it would be convenient were the amount due for water-rate paid into the Kurnool Treasury.

2. It would seem to be necessary that application for water for irrigation in these and other villages appertaining to Hyderabad Territory should be made in a regular manner to the Collector of Kurnool.

(Signed) J. MULLINS, Lieut.-Colonel, R.E.,

Sir.

At the request of the Chief Engineer I have the honor to hand you copy of a Report drawn up and signed jointly by himself and Mr W. H. G. Mills an Engineer in the Hyderabad P.W.D. giving the result of their investigation of the Company's claim for water supplied to the lands of Sultanpoor and Realampad in the Nizams Territory together with copy of a detailed Statement of the amount due to the Company also agreed to by those Officers and bearing their signatures.

I submit that this Report is conclusive as to the validity of the Company's claim, and that there is no ground for the refusal to pay the water rate.

I shall be glad to be furnished with a form E of this Irrigation in order that the amount Rs 1632- may be included in our next Revenue Statement.

I have the honor to be

Sir.

Your Most Ob. Servant.

Irrigation in His Highness the Nizam's Dominions

Settlement with Matrao Irrigation and Canals for 1869-72.

In reference to N.O. Sir Salar Jung's letter to Resident of Hyderabad No. 3861 of 17th November 1871, the Officiating Secretary to the Nizam's Government has the honour to forward for the information of the Chief Civil Officer of the Contract in the 25 villages in order to determine, if possible, the question raised by H.E. Sir Salar Jung, and adjudicated to settle the assessment on the Irrigation left by Sir Salar Jung to decision was whether the rents were unwilling to, carry in each cultivation.

2. In regard with the settlement, the village Officers have been questioned about the areas cultivated, as they are given in the abstract prepared for the Contract Surveyor and the Government and Patell (Village Headman), of the villages concerned; from Area of the Old Fields entered (in Khasra list) as irrigated in Subhanpur in 1871, was readily recognised by the village.

As to the Remaining of the crops, we find our Civil was exposed in Subhanpur. In Kalampad during last and absent was exposed by undue Patell who said that a measure of rice had been obtained from this area crop. But as the whole of the rice fields bordered the crops to have been cut and the seedlings of fresh thinking flows contiguous the Nalamund of the Contract Surveyor that the crop was within an hour of being ripe and in good condition when the measured in December and

Hands Copy of a Report together with Copies of detailed Statements drawn up & signed by Mess Latham & Mills on the subject of the Cos claim for water supply to the lands of Subhanpad Kalampad

and as no want of water was pleaded, but water was naturally running from the Canal through the fields in the 26 March, it was impossible to consider the Patelle denial as anything but a lie.

As to sufficiency of water supply no complaint was made.

As to the reasonableness of the water rate. By Clause 13 of the Contract of the Secretary of State for India in Council with the Madras Irrigation Canal Company dated 3 June 1863 in accordance with the special act of incorporation of 21 Victoria dated 11 May 1858 the water rate to be paid by cultivators is to be fixed by the Government of Madras and the Company so as to represent as nearly as circumstances will permit "a fair charge for the water supplied."

In consequence of this Engagement the Government of Madras, under the instructions of the Secretary of State for India, instituted extensive enquiries not only in districts already largely irrigated, but in the affected districts of Kurnool, Billary and Cuddapah, and at last in their Order No 1348 of 1st June 1866, fixed the present water-rate of Rs 6. as a fair rate, and ordered such rate to be collected from Cultivators using the water. This rate, fixed by the Madras Government, has been adopted in this settlement and no reasonable objection to it was made by the Villagers.

Lastly, as to the question of the willingness of the ryots to irrigate: there seemed no grounds for cancelling the right of the Company to be paid for the use of their water. The cultivators had made no complaint of their land being spoilt by water before sowing wet crop. No cases of dry crop spoilt by water were shown nor talked of. The wet crops had been carefully irrigated by Channels cut by the cultivators, and led off from the nearest available supply on the Company's land, or from natural water courses from which the Canal water flows - and lastly when the Company by closing their sluices limited to supply, so as to leave only leakage available the villagers opened the sluices surreptitiously at night. The Statement of the villagers that the cultivation has been unwillingly carried on is absolutely refuted by a comparison of the different years. In Sultanpore the wet cultivation (1 Crop) has varied between 26. 29 acres in 1871 and 15. 80 acres in 1869, and in Realampad between 55. 18 acres in 1871 and 37. 97 acres in 1872. It is moreover unreasonable to set aside the rate ordered by the Madras Government (as being a fair proportion of the increased profit realised by these ryots from wet crop) because the ryots allege that their land is rendered unfit for dry crop by the wetness of the ground caused by the Canal. Had they been unwilling to sow paddy, the Law can give no redress for mere sentiment. Had they been able to show that the wet crop is less lucrative than the dry crops, then they could fairly claim compensation from the Company for damaging their land by the leakage. But no such complaints were made: nor is it in accord with ordinary experience that the presence of the Canal has depreciated the value of their land.

In settlement of the water-rate due from the ryots of Sultanpore and Realampad to the Irrigation Company up to the season 1872-3 inclusive the undersigned enclose detail lists in the usual form.

If

It was alleged by the Patell of Sultanpur that some damage was caused by a breach of the Canal in 1869: but no account of this damage was submitted for settlement. If the Tahsildar of Sultanpur have any such accounts they ought to have been submitted at the time of settlement: and in case the omission to bring forward the accounts of damage arose from ignorance it is suggested that the Tahsildar submit it to the officers appointed for the next settlement.

The following is the total assessment for the villages named up to the present season inclusive, of which the details are shewn in the accompanying sheets.

	R.	a.	P.
Sultanpur 87 34 acres @ Rs. b-524-			8
Realampad 184-66 @ b-1107-	15		4
Rupees 1632-

Chief Engineer

No 1.

Submitted to Government with a recommendation that arrangements be made for the remission to the Collector of Kurnool of the sums shown to be due for the past irrigation under the Madras Irrigation and Canal Company's Canal, of lands belonging to Hyderabad Territory. Similarly for any irrigation that may be carried on in future years it would be convenient were the amount due for water rate paid into the Kurnool Treasury.

2 It would seem to be necessary that application for water for irrigation in these and other villages appertaining to Hyderabad Territory should be made in a similar

Enclosure.

Statement showing the accurate measurement of wet cultivation in the Village of Settapa Nizamat Dominion

regular manner to the Collector
of Kurnool.

Fort Saint George
4th April 1873

Lieut. Col. R.E.
Chief Engineer for Irrigation

To,
The Secretary to Government
Public Works Department.

No 1270

To,
The President at Hyderabad.

Sir,

With reference to the correspondence terminating with the letter from your office dated 18th January 1873, Lo 329 of same, I have the honor to forward the accompanying papers, comprising a report submitted conjointly by the Chief Engineer of the Nizam's Irrigation and Land Company and Mr. Gillo, an Engineer in the Hyderabad P.W.D.

I have &c.

P. W. 1873 Department.
Inward for May
No. 2193.
From
The Chief Engineer
for Irrigation.
To
The Secretary to
Government
P.W.D.
Dated 4th April
Received 5th 1873.
Enclosures 4.

No. 1269. 1270 & 1271 dated 3rd May 1873.
Submits to Government a report by Mr. Sutherland and Mills on the subject of the Company's Claim for water supplied to the lands of Sultanpoor and Readampad.
With an order.

No. 1269
Dated Hyderabad the 3rd May 1873.
Letter to Resident.
" Chief Engr.
" Secretary to Govt. P.W.D.

No Chief Engr. for Irrigation
" Secretary to Govt. P.W.D.
" Nizam's Irrigation & Land Subsidiary Company Limited
" Mr. Gillo

× Dated 1st/2nd/3rd May 1873 respectively.
Recd. 5-5-73.

1057
6 May 1873

deputed for the purpose containing the result of their investigation of the Company's claim for water supplied to the lands of Sultanpoor and Realampad in the Nizam's Territory, together with statements of claims amounting to Rs. 1632 which I am to request may, with all similar dues in future, be paid into the Kurnool Treasury.

As suggested by the Chief Engineer for Irrigation, it seems advisable that applications for water for Irrigation in the Villages belonging to the Hydrabad Territory

should invariably be made to the Collector of Kurnool.
