MISCELLANEOUS No. 1900 REVENUE DEPARTMENT.

PROCEEDINGS OF THE BOARD OF REVENUE.

Dated 28th March 1873.

No. 43 Read the following

From W. L. Foster Esqre
Acting Collector

To J. Groze Esqre
Secretary to the Board of Revenue
Madras

Sir,

With reference to the Board's Proceedings dated 11th July 1872 No. 1284, I have the honor to forward a project for improving the supply of water to the Penugudure salt pans, together with an estimate for Rs. 11,300 for carrying out the work, and request sanction.

2. A copy of the District Engineer's letter dated 20th Ultimo No. 942 is enclosed, and I refer the Board to para 2 of Colonel Fischer's letter on the subject of a lock to be used as a sluice.

Estimate for Improvements
Entrance
Tenneculum Creek

New Canal — Rs. 2,150
Reservoir — " 1,900-
Sundries — " 200-
Training Dykes — " 3,000
Lock — " 2,450
Sluice — " 1,500

Rupees 11,300

As works of Petty Construction and Improvement, the cutting of a new Canal on a smaller section sufficient for the passage of boats and to admit in one tide enough salt water for the purpose of Manufacture, and to fill the old Canal bed; and perhaps also the construction of a scouring Sluice where the Coringa Road crosses, might be advisable, and within the scope of the Revenue Budget- The artificial reservoirs proposed are too small to be efficacious; and the object proposed to be attained by a Lock is sufficiently carried out by the expedients at present in use- While the effect of the training groynes is not likely to be worth their cost in construction and renewal; and

and their length might inconvenience navigation in the Coringa River.

The only really effective method of attaining the desired result, being, as already settled, the connection of the Cocanada and Coringa Canals with a Lock into the straightened and widened Creek, it will be remitted to the Chief Engineer for Irigation to state whether the impression noted in para 4 of his Mem.o No 90 of 13th April 1870, that such a Canal is superfluous for purposes of Irigation has been confirmed, on further enquiry. If not, it would seem desirable that its execution should be undertaken, jointly, from Local and Imperial Funds; in such proportions as may be thought to represent the respective benefits that would accrue from it, viewed respectively as an Agricultural and Salt work; or as

as a means of cheap
communication forming
a most valuable link
between existing lines-
