Dated	11-16	18/19

Not to be folded or roughly handled

*Proceedings of the Madras Government, Public Works Department,
14th June 1873.*

No. 198. Read the following letter from Major J. N. HUNTER, R.E., District Engineer, Salem, to Colonel G. W. WALKER, R.E., Secretary to Government, Public Works Department, dated Salem, 28th May 1873, No. 35 :—

WITH reference to G. O., No. 535, of 28th February 1872, I have the honour to inform you that I have had all tanks in
One List of Tanks. which breaches might affect the railway

in this district examined thoroughly, and to submit herewith a list showing their condition, etc.

2. The Tripatore Range Officer, in whose taluqs these tanks are situated, has been requested to submit estimates for Government tanks that require repairs; and the Collector of Salem has also been requested to adopt measures to have all Mittah tanks maintained in a state of security.

3. The Salem Range Officer reports that there is only one tank, the Nadamanary tank in the Trichengode Taluq, which might damage the railway bank if it burst. I have called upon him to report on its condition and submit an estimate for its repair if necessary.

4. The Oosoor Range Officer reports that the line of railway does not pass through any part of his range, and it would be extremely improbable that any damage would accrue to the railway embankments by the breach of any tanks in his range.

No. 199. ORDER THEREON, 14th June 1873, No. 1,566.

IRRIGATION, No. 30.

COMMUNICATED to the Chief Engineer for Irrigation in continuation of previous orders on the subject.

(True Extract.)

Colonel, R.E.,
Secretary to Government.

To the Chief Engineer for Irrigation, with Statement.
,, District Engineer, Salem.
