To enable me to meet your wishes and those of the Consulting Engineer for Irrigation for the speedy supply of taluq maps, reduced from the original Revenue Surveys, I have the honour to suggest that a small temporary establishment should be added to my office (scale as per margin), and that its cost should be defrayed from the Department Public Works Budget.

The frequent calls from the Surveyor General of India and the Supreme Government for geographical materials is an additional reason for my urging the adoption of this means of accelerating the publication in a complete form of the manuscript taluq maps already lodged in the Central Survey Office. I am in hopes that these arrears may be cleared off by the proposed establishment within a year, and beg that if the funds can be granted the sanction for their transfer and for setting the establishment at work may date from the 1st proximo to the end of the official year 1873-74.
