*Proceedings of the Madras Government, Public Works Department,
23rd January 1873.*

No. 474. Read the following letter from the District Engineer, Presidency, to the Chief Engineer and Secretary to Government, Public Works Department, dated Fort St. George, 23rd December 1872, No. 2,698:—

IN submitting the two original letters as per margin from the General Superintendent of Public Works Stores and Workshops, I have the honour to request that you will be so good as to sanction an extra allotment of Rupees 32,260 under the different heads noted by the General Superintendent to meet the excess over the Budget grant for London supplies which has been already reported to you by the Controller of Accounts in paragraph 15 of his letter No. 1,982, dated 26th November 1872.

From the General Superintendent of Public Works Stores and Workshops, to the District Engineer, Presidency, dated Chepauk, 10th December 1872, No. 958.

I HAVE the honour to enclose, in original, letter from the Controller of Public Works Accounts, forwarding extract (paragraphs 14 to 16) of his letter to Government regarding the excess of Rupees 25,260 shown in the progress report of this department for September 1872 over the Budget grant of Rupees 10,000 allotted for the current year for London supplies, and requesting me to report fully upon the subject for the information of Government.

2. I beg to observe that the Controller is correct in stating that the excess alluded to is owing to stores indented for in previous years and expected to be delivered here before the 31st March last, having subsequently come to hand. In addition to the above excess of Rupees 25,260, I beg to state that from the bi-monthly return of stores under provision furnished by the Director General of Stores, London, it would appear that three boilers for steam dredges in the Godavery would be despatched in October last direct to Cocanada if possible, but no advice as to their date of shipment has as yet been received. The boilers, if received within the current official year, will increase the excess amount by about Rupees 7,000; so that an assignment of Rupees 32,260 will have to be made on account of London supplies instead of Rupees 25,260.

3. I beg to append a statement showing the date of sailing of each vessel and date of clearance with the value of each consignment, inclusive of Indian expenses for two-thirds freight payable here, landing and other charges.

Statement showing Consignments of Stores received from England from April to October 1872, with the distribution of each Consignment between Tools and Plant and Stock, inclusive of Indian Charges.
