for future use. I believe the certificate granted by the District Engineer of Salem contains all information that is of any practical use; from the Station books of Road Maintenance Grants, as also from the Range Officers' and Overseers' measurement books, all details of work done can, if required, be easily obtained. These remarks refer to maintenance grants worked out by departmental agency, and not by contract, which description of work is separately provided for.

Certificate

Sir,  
I have the honor to en-  
quire whether I may accept  
completion certificates like that  
enclosed which has not been  
drawn up in accordance with  
the prescribed form B. Vide  
G.O. No 104 of the 16<sup>th</sup> March  
1871. It will be seen that the  
Certificate

Certificate is countersigned by  
the District Engineer.

2- In my opinion there is no  
objection to Certificates like that  
enclosed being furnished and  
accepted for all work done on  
Maintenance fronts, for, as remarked  
by the Osoyoos Range Officer, it  
is quite impossible even after one  
month to check any road repairs  
unless the traffic is turned off.

I have the honor to be

and remain Sir,

Your most obedient servant
