Proceedings of the Madras Government, Public Works Department,
11th November 1873.

No. 149. Read the following endorsement of the Revenue Department, dated Ootacamund, 24th October 1873 :—

Proceedings of the Board of Revenue, dated 7th October 1873, Miscellaneous No. 6,700.

Read Compensation Statement from the Collector of Bellary, dated 18th September 1873.

SUBMITTED for the orders of Government.

2. The Collector reports that 2 acres of wet land are required by the District Engineer for ballast pits to be dug for the repairs of the tank in the Chinna Toombalam village of the Adoni Taluq. The land which is situated under the tank is very valuable, and it is proposed to buy it at Rupees 75 an acre, this being the selling price of similar land in the neighbourhood.

3. It is also proposed to allow the owner of the land Rupees 50 for a well of which no further use can be made by him. The Collector has ascertained from the District Engineer that the compensation of Rupees 200, recommended in these Proceedings, may be met from the allotment under the head of "Repairs Agricultural" in the Imperial Budget. The Board however would suggest for consideration whether the earth required for the repair of the bund might not be taken from the bed of the tank in shallow pits.

Acting Secy. to Government, R.D.

No. 150. ORDER THEREON, 11th November 1873, No. 2,738.

IRRIGATION, No. 8.

IT is not understood why a reference to Government is made in this case, unless the revenue of the tank be so small as to cause the estimate for its repair, with the addition of Rupees 200 in question, to exceed the amount which the District Engineer is competent to sanction. In the absence of such information the Government can only deal with this matter by referring it for disposal by the District Engineer, who is also the authority competent to decide whether earth for the repair of the bund is to be taken from inside or outside the tank.
