Dated	31-3-	1843

Not to be folded or roughly handled

*Proceedings of the Madras Government, Public Works Department,
31st March 1873.*

No. 706. Read the following endorsement of the Controller of Public Works Accounts, dated Fort St. George, 7th March 1873, No. 2,933:—

From the District Engineer, Godavery District, to the Controller of Public Works Accounts, dated Dowlaishweram, 15th February 1873, No. 878.

In forwarding herewith copy of a letter, No. 521, dated 5th February 1873, received from the Officer in charge of No. 4 Range, Godavery, regarding the charging off to "Profit and Loss" portion of the value of lime-kiln at Chagulla, viz., Rupees 441, and the value, Rupees 8, of the 40 parahs of old lime borne on the Stock Account of that Range, I have the honour to request that, under the circumstances brought to notice by Lieutenant J. F. Dorward, you will be good enough to obtain the sanction of Government to the abovementioned sum of Rupees 449 being written off to "Profit and Loss."

From Lieutenant J. F. DORWARD, R. E., Assistant Engineer, No. 4 Range, Godavery District, to the District Engineer, Godavery District, dated Ellore, 5th February 1873, No. 521.

I HAVE the honour, as requested in your docket No. 360, dated 5th January last, to report the actual amount of the portion of the book value of the stock at Chagulla that must be written off to "Profit and Loss."

That stock consists of—

	RS.
97 cubic yards of lime-stone	114
40 parahs old lime	8
Lime-kiln	541

Total... 663

2. Since writing to you on this subject, my letter No. 454, dated 18th December last, I have been able to use up all the lime-stone myself, by burning it, or rather by having begun to do so in a temporary kiln at Tadapillygoodem for the road to Nullacherla, and I have charged it to that road at its full book value, so that there is nothing here to write off to "Profit and Loss."

3. The 40 parahs of old lime are worthless, and their value, Rupees 8, must be written off. From the records it would appear that, in June 1870, when the works in the delta were separated from this range, there was a store of lime at Chagulla which was not taken over by the Executive Engineer in charge of No. 3 Range, and that the 40 parahs under reference are the remains of that store, so that if the Government are of opinion that this sum should be charged against works, the mid level channel works should be saddled with it.

4. In the case of the lime-kiln, I am sorry that I recommended its being knocked down, more especially as to do so, to clean the stones and stack them, would cost almost as much as the stone is worth. I am not at present in want of stone there, and, at some future time, the officer in charge of this range may wish to burn lime again at Chagulla. It would be better for him then to have this kiln to repair, than to have to build a new one. But I do not think that it should be allowed to remain on the Stock Account at its present enormous value. It contains above 200 cubic yards of rough stone; and if we say that each cubic yard is worth 8 annas, we do not depreciate its value, for the original cost is 11 annas a cubic yard, and it would cost at least 3 annas to dismantle and clean the stones. The whole value of the kiln would then be Rupees 100, and the difference between that and its book value, or Rupees 441, should be struck off to "Profit and Loss." The lime-kiln was built for the works in the delta.

4. The total sum to be written off is therefore Rupees 449.

*Proceedings of the Madras Government, Public Works Department,
31st March 1873.*

SUBMITTED for the orders of Government. The undersigned would observe that according to paragraph 2 of the Resolution of the Government of India, communicated in G. O., No. 1,054, dated 15th April 1871, the works on account of which the charges were originally incurred should be debited with the loss in question, and not the head "Profit and Loss." Looking, however, to the length of time that has elapsed since the charges were first incurred and the numerous works in the delta, it is left to the Government to consider the expediency of charging the sum of Rupees 449 to "Profit and Loss," as recommended by the District Engineer.

(Signed) S. BROCK,
Controller of Public Works Accounts.

No. 707.

ORDER THEREON, 31st March 1873, No. 983.

ACCOUNT, No. 67.

His Excellency the Governor in Council sanctions the sum of Rupees 449 to be written off to "Profit and Loss."

(True Extract.)

N^o. 521. N^o. 4 Range Office,
Ellore, 5th February 1873.

From

The Assistant Engineer,
N^o. 4 Range, Godavery District

To,

The District Engineer,
Godavery District

Sir,

I have the honor, as requested in your docket N^o. 360 dated 5th January last, to report the actual amount of the portion of the Book value of the Stock at Chagalloo that must be written off to Profit and Loss.

That Stock consists of

97 cubic yards of Lime Stone	N ^o . 114-11
40 pounds old Lime	8-11
Lime Kiln	541-11

Total Rupees-663-11

2. Since writing to you on this subject, my letter No. 154, dated 18th December last, I have been able to use up all the lime stone myself, by burning it, or rather by having begun to do so, in a temporary kiln at Tadapillygudem for the road to Nallacherla, and I have charged it to that Road at its full book value, so that there is nothing here to write off to Profit and Loss.

3. The 40 Parahs of old lime are worthless, and their value, Rs. 800 must be written off. From the records, it would appear that, in June 1870, when the works in the Delta were separated from this Range, there was a store of lime at Chagalloo which was not taken over by the

5
Sentine Engineer in charge of No. 3 Range and that the 40 Parahs under reference are the remains of that store, so that, if the Government are of opinion that this sum should be charged against works, the mid level channel works should be saddled with it. —
In the case of the lime kiln, I am sorry that I recommend its being knocked down, more especially as to do so, to clear the stones and stack them, would cost almost as much as the stone is worth. I am not at present in want of stone there, and, at some future time, the officer in charge of this Range may wish to burn lime again at Chagalloo. — It

would be better for him than
to have this kiln repaired,
than to have to build a new one.
But I do not think that it
should be allowed to remain
in the Stock Account at its
present enormous value. It
contains about 200 cubic yards
of Rough Stone; and if we say
that each cubic yard is worth
8 annas, we do not depreciate
its value, for the original
cost is 11 annas a cubic yard,
and it would cost at least 3
annas to dismantle and
clear the stones. The whole
value of the Kiln would then
be Rupees 100, and the difference
between that and its book
value, or Rupees 441, should
be struck off to Profit and

7.
Loss. The time kiln was
built for the works in the
Delta.

11 The total sum to be
written off is therefore Rupees
449.-
