Dated	30-4	1874	-195-

Not to be folded or roughly handled

*Proceedings of the Madras Government, Public Works Department,
30th April 1874.*

No. 446. Read the following letter from A. C. LAWFORD, Esq., Officiating District Engineer, South Canara, to Colonel G. W. WALKER, R.E., Secretary to Government, Public Works Department, dated Camp at Udipy, 21st March 1874, No. 156 :—

I HAVE the honour to forward herewith, for sanction and provision of funds during the ensuing official year, an estimate, amounting to Rupees 250, with the countersignature of the District Judge, for plastering the floor of the Munsif's Court House at Bramawar, returned to me by the Inspecting Engineer for Civil and Military Buildings for submission to Government under G. O., No. 309, of 9th February 1874.

2. In the estimate for the construction of the Court House, which was completed during the last official year, unplastered laterite was allowed for flooring, which being rough and uneven is now a source of great discomfort to those frequenting the Court. At the request therefore of the District Judge I propose a composite flooring as capable of withstanding wear, better than plaster, and at the same time cheaper than asphalte.

No. 447. ORDER THEREON, 30th April 1874, No. 1,129.

CIVIL WORKS, No. 51.

SANCTIONED for execution from funds at the disposal of the District Engineer.

(True Extract.)

Colonel, R.E.,
Secretary to Government.

To the District Engineer, South Canara.
.. Officiating Controller of Public Works Accounts.
.. Inspecting Engineer for Buildings.

Specification.

The work to be executed is the plastering of the
 Crack house at Brammar, with the Composite over the
 existing latents floor throughout.

The Composite shall consist of the following materials

- 1 Part of measure of good Coal tar.
- 2 - - - - - of well burnt lime
- 2 - - - - - of clean river sand

The tar shall be poured into an iron boiler and heated
 until it gets perfectly liquid. Then the mixture of lime & sand
 from unburnt shells &c, and river sand cleaned from all
 impurities, to be added to the tar in the above proportion.

The Composite shall be well stirred with wooden lads
 until the materials are thoroughly mixed, when it shall
 be laid upon the floor to the depth of 3/4 of an inch and
 shall be well beaten down. The surface shall then be

Carefully

Carefully smoothed with trowel similarly to the
process of human plastering.

Colonel G. H. Walker R.E.
Secretary to Government
S. P. O. Madras.

I have the honor to forward
herewith for sanction & provision
of funds during the ensuing financial
year, an estimate amounting to
Rs 250 with the countersignature of
the District Judge for plastering
the floor of the Munsiff's Court
house at Brama war, returned to
me by the Inspecting Engineer for Civil
& Military Buildings for submis-
sion to Government under G. O. No. 309
of 9 February 1874.

2. In the Estimate for the Constn.

tion of the court house, which was
completed during the last official
year, unplastered latents were al-
lowed for flooring, which being rough
& uneven is now a source of great
inconvenience to those frequenting the
Court. At the request therefore
of the District Judge I propose
a compact flooring capable
of withstanding wear better than
plaster and at the same time cheaper
than asphalt.
