B.P. No.		Mis.
Dated	25-8-	1954

Not to be folded or roughly handled

*Proceedings of the Madras Government, Public Works Department,
25th August 1874.*

No. 622. Read the following endorsement of the Chief Engineer for Irrigation, dated Ootacamund, 10th August 1874, No. 24 :—

From J. H. LATHAM, Esq., Chief Engineer and Manager of the Madras Irrigation and Canal Company, to Lieutenant-Colonel J. MULLINS, R.E., Chief Engineer for Irrigation, dated Kurnool, 3rd August 1874, No. 90.

21st Mile Breach.

I HAVE the honor to report, in continuation of my No. 86, of 20th ultimo, that in the course of two or three days the water in the canal was sufficiently reduced to admit of operations being carried on for closing the breach, and that water was safely passed on Sunday, yesterday, at daylight, a fortnight after the occurrence, and is now 3 or 4 feet deep in the canal.

2. The supply of the lower sections has been maintained throughout.

3. The breach was nine yards depth in front, and ten in rear ; 9 feet breadth at top, and 2 to 1 slopes. Its length averaged exactly a chain (66 feet.) The puddle was brought a distance of half a mile, and the rest of the earth from five to ten chains distance. The puddle face, which is continuous for a length of thirty-seven yards, was yesterday everywhere above full water level.

SUBMITTED for the information of Government, in continuation of this office No. 19 of the 27th ultimo.

(Signed) JOHN MULLINS, Lieut.-Colonel, R.E.,
Chief Engineer for Irrigation.

No. 623. ORDER THEREON, 25th August 1874, No. 2,410.

IRRIGATION, No. 56.
