Dated	14-10-1874	195 .

Not to be folded or roughly handled

*Proceedings of the Madras Government, Public Works Department,
14th October 1874.*

No. 326. Read the following letter from J. H. LATHAM, Esq., Chief Engineer and Manager of the Madras Irrigation and Canal Company, to Lieutenant-Colonel J. MULLINS, R.E., Chief Engineer for Irrigation and Joint Secretary to Government, Public Works Department, dated Kurnool, 9th September 1874, No. 113:—

I HAVE the honor to hand you a Statement exhibiting the amounts realized by the sale of the Company's surplus stores, as authorized to be sold in G. O., No. 1,809-A, of 14th July 1873, in comparison with the book quantities and value thereof; and showing a net deficiency of Rupees 18,310-9-6, and request your instructions for the adjustment of the same.

2. In this statement I have shown the stores and stationery separate, and beg to suggest that the amounts deficient under these heads be charged respectively to Construction (Construction, Distribution and Buildings) and to General Management. With regard to the depreciation in value of the stores shown by these sales, viz., 39 per cent. on the book value, I would remark that part of them were selected and purchased by private arrangements by Great Southern of India Railway, the Dowlais veram Workshop, Mr. D'Closett, and the Public Works Department, Government of Fort Saint George, at reduced rates, discount being allowed varying from 20 to 35 per cent. on book values; the remainder, for which no satisfactory offer was made, were sold by Messrs. Franck and Co. by public auction after the same had been fully advertised in the Calcutta, Bombay, and Madras papers, as well as in Burmah and Ceylon.

3. Perhaps some mistake has been made in issues of zinc, spelter and sheet, and solder spelter, as well as in issues of nails, but the net deficiencies seem to be moderate, though no excuse for them can now be made.

4. With regard to the summary; the figures in column 5 represent the actual book value of the several items remaining on hand as shown in the list, and is equal to the difference between the columns 3 and 4 by adding to the same the deficiency less the surplus (columns 8 and 7.)

19-3
