B.P. No.		Mis.
81-82		
Dated	9 / 1 / 1874	195

Not to be folded or roughly handled

*Proceedings of the Madras Government, Public Works Department,
9th January 1874.*

No. 81. Read the following letter from Lieutenant-Colonel J. H. M. SHAW-STEWART, R.E., Consulting Engineer for Railways, to Colonel G. W. WALKER, R.E., Secretary to Government, Public Works Department, dated Madras, 5th December 1873, No. 654 :—

ADVERTING to the Proceedings of Government, dated the 26th ultimo, No. 2,856, I regret to observe that I have inadvertently understated the dimensions of the small strip of land within the station enclosure at Coimbatore which is liable to be flooded by the water of the tank when full.

2. I have the honour to submit, for the consideration of Government, a Survey* of the station enclosure which

* No. 18. To be returned. has just been received in this office,

and which shows that when the tank is completely filled the maximum area within the station ground covered by its waters measures about 150 yards by about 20 yards. The figures given in my letter, 80 yards by 15, represented the flooded area at the time of my visit when I understood the tank to be full. It will be seen that the distance of the nearest part of the flooded land from the station house is about 275 yards.

3. In the Survey is shown the position of the 9-feet arch, which was built by the Railway Company in the public road to allow their compound to drain into the tank. The water of the tank, when full, washes the public road which bounds the station compound on the south, and extends along the line of this road far to the east and west of the station.

No. 82. ORDER THEREON, 9th January 1874, No. 38.

RAILWAY, No. 14.

RECORDED with reference to G. O.,
No. 2,856, dated 26th November 1873.

Letter No. 654

From

LIEUT. COLONEL J. H. M. SHAW STEWART, R.E.,

Consulting Engineer for Railways,

To

COLONEL G. W. WALKER, R.E.,

Secretary to Government,

Public Works Department,

Fort Saint George.

SIR,

Adverting to the Proceedings of Government dated the 25th ultimo, No. 2856, I regret to observe that I have inadvertently understated the dimensions of the small strip of land within the station enclosure at Coimbatore which is liable to be flooded by the water of the tank, when full.

I have the honour to submit, for the consideration of Government, a survey of the station enclosure which has just been received in this Office, and which shews that, when the tank is
