*Proceedings of the Madras Government, Public Works Department,
29th September 1874.*

No. 568. Read the following letter from Major J. N. HUNTER, R.E., District Engineer, Salem, to Colonel G. W. WALKER, R.E., Secretary to Government, Public Works Department, dated Yercaud, 10th September 1874, No. 115:—

In reply to G. O., No. 1,904, dated 15th July 1874, I have the honor to state that the principal reason of the short outlay on Irrigation Works in April 1874 arose from the necessity of works being finally inspected and passed by the Range Officers before the money due to Contractors for completed works could be paid; and as the principal ranges are large, this is a work of time.

2. The sudden stoppage of work late in the past year, owing to the finishing of the allotments, made it difficult to begin again in the new year with the new allotments.

No. 569. ORDER THEREON, 29th September 1874, No. 2,737.

IRRIGATION, No. 66.
Account.

THE reason for short expenditure given in paragraph 1 of the foregoing letter is evidently inadequate, the outlay having been but Rupees 1,243; a very small amount of work to have been passed in a month. It is requisite that much more energy in carrying out Agricultural Works should be shown.

District Engineer's Office,
Salem 18th September 1874
From

The District Engineer,
Salem.

The Secretary to Government,
Public Works Department.
Sir,

In reply to G. O. No. 1904 dated
15th July 1874, I have the honor to
state that the principal reason
of the short outlay on Irrigation
works in April 1874 arose from
the necessity of works being fi-
nally inspected and passed by
the Range Officers before the money
due to contractors for completed
works could be paid; and as
the principal ranges are large
this is a work of time.

2. The sudden stoppage of work
late in the past year, owing to

The reason for that expenditure given in para 1 of the
 foregoing letter is evidently inadequate, the outlay having
 been but \$1263 - a very small amount of work to have
 been expended in a matter less important than much
 more urgent engineering and agricultural work should
 be shown.
