Proceedings of the Madras Government, Public Works Department,
28th April 1874.

No. 350. Read the following letter from Lieutenant-Colonel J. H. M. SHAW-STEWART, R.E., Consulting Engineer for Railways, to Colonel G. W. WALKER, R.E., Secretary to Government, Public Works Department, dated Madras, 31st March 1874, No. 205 :—

I HAVE the honour to submit, for the sanction of the Government of India, an estimate,* amounting to Rupees 7,574, of the cost of extension of passenger platform and alteration and additions to permanent-way at Arconum Station on the Madras Railway, the sum chargeable to Capital being Rupees 6,281.

* With plan No. 1,023.

	Rs.
Indian	1,117
English	5,164
Total ...	6,281

2. In forwarding the estimate the Agent quotes as follows from a letter from the Traffic Manager :—

"The Station Master has again represented the very great difficulty passengers experience from time to time in consequence of the limited length of the north platform on the South-West Line, and the present is probably a favourable time to consider the question of lengthening the platform.

"By removing the water-column and wood staging at the east end of the platform—the water-column is never used by trains calling at the station, and the staging would be more conveniently placed close to the water-column where engines take water—the platform might be slightly lengthened at the east end.

"At the west end, however, we must look for what we want, and here an alteration in the sidings communicating with engine-shed and carriage-shed must be made."

3. I have satisfied myself as to the necessity for the work, and recommend that application be made to the Government of India for sanction.

4. The expenditure will be met from Schedule B., Budget Estimate for 1874-75, and the sanction will lapse at the end of the eighth quarter after receipt of sanction.
