No. 49. *Note by the Chief Engineer for Irrigation.*

THE proposition for acquiring land at the Gopaulpore lunka, in connection with river conservancy, has been brought forward in the wrong way. The course to be adopted is clearly laid down in Proceedings, Madras Government, No. 941, of the 30th March 1871, and until that is followed the matter cannot be disposed of.

2. Very strong evidence would be needed of the necessity of acquiring 982 acres of land at one part of the river, before a recommendation to that effect could be made to Government.

3. When the circumstances of the locality have been clearly explained by plans or surveys, and it is understood what is proposed to be done to remedy the evils complained of, and what new alignment of the river here is desirable, it will be comparatively easy to decide what extent of land it will be requisite to acquire.
