*Proceedings of the Madras Government, Public Works Department,
23rd March 1874.*

No. 623. Read the following Proceedings of the Madras Government in the Marine Department, dated 27th February 1874, No. 54:—

ABSTRACT.—*Pulicat*.—Letter from the Master Attendant requesting that an estimate may be called for for repairing the Pulicat Light column and the Superintendent's quarters, and stating that the boat channel leading from the canal to the Light-house also requires clearing out and deepening, communicated to the Public Works Department for issue of the necessary orders.

No. 624. ORDER THEREON, 23rd March 1874, No. 809.

CIVIL WORKS, No. 65.

It is not clear why a reference has been made to Government on the subject of the repair of the Light column and Superintendent's quarters at Pulicat, District Engineers having full power to carry out all ordinary repairs of this character on direct application from the departments concerned; it is only necessary that application be made to Government for transfer of funds. In this instance it has been made too late to enable the work to be carried out within the official year. It will therefore have to be renewed when the probable cost of the repairs is known.

2. The District Engineer will prepare an estimate for clearing out and deepening the boat channel, and carry it out when provided with the necessary funds.

Proceedings of the Madras Government, Marine Department.
27th February 1874.

No. 38. Read the following letter from H. D. E. DALRYMPLE, Esq., Master Attendant, Madras, to the Hon. W. HUDLESTON, Chief Secretary to Government, Fort St. George, dated Madras, 19th February 1874, No. 1100:—

Administrative Department.

I have the honour to bring to the notice of Government that the light column and Superintendent's quarters at Pulicat are much in need of repairs, and to solicit that Government may be moved, in the Public Works Department, to direct the District Engineer to prepare and submit the necessary estimates, with a view to the buildings being put into a state of thorough repair. They were last repaired in the close of the official year 1869-70.

2. The boat channel leading from the canal to the lighthouse has also silted up, and requires clearing out and deepening, and I would strongly recommend that this work be also attended to as soon as possible.

3. As a sum of Rupees 400 is at present available from savings in the Marine Budget for the official year now about to close, under the head of "Provincial Services, Pulicat Lighthouse," I would respectfully suggest that this sum be at once placed at the disposal of the District Engineer, with a view to the works being speedily carried out.

No. 39. ORDER THEREON, 27th February 1874, No. 54.

The necessary orders will be issued in the Department of Public Works.

(True Extract.)

Acting Chief Secretary.

To the Public Works Department.

„ Master Attendant, Madras.
