REMARKS.—*This work has been progressing favorably, and would have been completed within the year if the original design had been adhered to; but as the work progressed, and the new channels came into use, certain alterations involving some delay, but not additional expense, have been suggested, and determined on with the approval of the Officer Commanding the Regiment; hence it has become necessary to surrender 300 Rupees which will be required to complete the work in next official year.

† Owing to delays in obtaining a site in the first instance, and the recent suspension of operations at the request of the authorities concerned, the Range Officer finds that there would not be time now to complete the building in a satisfactory manner within the year, and prefers reserving 300 Rupees of the estimate for payments to be made in next official year; meantime the work is being proceeded with as rapidly as possible.

2nd March 1874.
