B.P. No.	6, 8	Mis.
Dated	1-4-1874	195.

Not to be folded or roughly handled

*Proceedings of the Madras Government, Public Works Department,
1st April 1874.*

No. 6. Read the following papers:—
From Captain A. EDGCOME, R.E., Officiating District Engineer, Bellary, to
Colonel G. W. WALKER, R.E., Secretary to Government, Public
Works Department, dated Camp at Jachaleherum, 21st February 1874,
No. 1,802.

I HAVE the honour to submit, for the sanction of Government, the accompanying abstract estimate, for Rupees 500, with a plan and report for constructing a screen wall to the latrine, and for constructing two masonry drains to carry off the refuse water from the wash-houses attached to the European Female Hospital at Bellary.

2. The screen wall is required for the "receptacles," and the drains to the wash-houses are required on sanitary grounds. The dirty water at present forms itself into large pools in front of the building. A copy of the requisition from the Military authorities for the above work is enclosed for information. The estimate has been approved by the Brigadier-General.

3. The construction of the drains has been undertaken by the Range Officer on emergency at the request of the Military authorities, and an expenditure of Rupees 171 incurred. An allotment to cover this outlay has been applied for in the statement of savings and demands submitted to Government on the 2nd February 1874.

4. The Range Officer has been instructed not to incur further expenditure until the estimate has been sanctioned; funds for the balance of the estimate will have to be provided from the grant for "Minor New Works, Military," for the next year.

5. The papers have been returned by the Inspecting Engineer for Buildings for transmission to Government direct under G. O., No. 309, dated 9th February 1874.

No. 148.

MEMORANDUM.

ADVERTING to the letter from the District Engineer, Bellary, No. 1,802, dated 21st February, submitting estimates with plan for constructing a screen wall to the latrine and two masonry drains to carry off the refuse water from the wash-houses attached to the European Female Hospital at Bellary, the Chief Engineer requests to be informed how it is intended to dispose of the dirty water when discharged at the end of the 90 feet drains.

(Signed) G. W. WALKER, Colonel, R.E.,
Secretary to Government, P.W.D.

27th February 1874.

No. 7. From Captain A. EDGCOME, R.E., Officiating District Engineer, Bellary, to Colonel G. W. WALKER, R.E., Secretary to Government, Public Works Department, dated Camp at Santakudlur, 7th March 1874, No. 1,882.

REFERRING to your memorandum, No. 148, dated 27th February 1874, I have the honour to state that the dirty water is proposed to be carried into the spot at the end of the drains where there is a plantation of young trees. The senior Medical Officer suggested that the refuse water should be disposed of in this manner.

Proceedings of the Madras Government, Public Works Department,
1st April 1874.

No. 8.

ORDER THEREON, 1st April 1874, No. 906.

MILITARY WORKS, No. 1.

The plan and estimate submitted with this letter are sanctioned. The Minor New Works allotment of the Bellary District has been supplemented by Rupees 1,000 in the statement of demands.

(True Extract.)

Colonel, R.E.,

Secretary to Government.

To the District Engineer, Bellary.
Officiating Controller of Public Works Accounts,
Military Department.

Copy of Letter No. 26, June 1873 from
the Surgeon Major 18th Regiment

I have the honour to request you
will have the goodness to bring the
following requirements of the Hospital
to the notice of the proper authorities
in order that they may be at once
taken up.

- 1st There is required outside of the
latrine in new House Hospital
a Scum wall for the "Reptiles"
- 2nd "Drains" to be constructed taking
off the water from the ablution
rooms of the same Hospital.
- 3rd The flooring of the same Hospital
generally requires repairs.
- 4th The roof of Hospital requires
Quarter walls.
- 5th Pipes from ablution Room of
same

39 Report for accompanying the Dr.
Quinto for constructing seven Willow
Drains for the Farms & Hospital.

Account of Edmund R. 212-219

A Screen Wall of Stone masonry 14 ft. broad and 8 ft. high, resting on foundations 2' broad and 2' deep will be built in front of the Sweepers entrance to the two Priors.

The will will have a known copy and
will be found to be in the public domain.

A letter from John H. Lake, Jr. dated 1891.

The wall is required to screen the iron post-
-cylinders for excretia &c, which are to be
placed outside the door of the Sweepers
entrance.

Two bricks in Chimney Drower go long
well be built, to carry off the water from
the two Wash Tubs.

The Drains will be plastered inside and
will be covered with slabs and earth.

The image shows the front cover and spine of a book. The main cover is a dark, charcoal grey color with a fine, pebbled texture, characteristic of cloth or buckram binding. The spine, visible on the left, and the bottom edge of the cover are finished with a lighter, tan-colored material that has a smoother, leather-like texture. The book is shown from a slightly angled perspective, highlighting the transition between the two materials.

Referring to your Memoir
of the 14th inst 24th February 1871 I have
the honour to state that the City and
County of London are disposed to be
at the cost of the disease when there is a
time of spring tide. The Local Medical
Officers suggested that the sewer water should
be disposed of in this manner.
