Proceedings of the Madras Government, Public Works Department,
18th November 1874.

No. 303. Read the following letter from Lieutenant-Colonel J. F. FISCHER, R.E., District Engineer, Madura, to Colonel G. W. WALKER, R.E., Secretary to Government, Public Works Department, dated Pulney, 27th October 1874, No. 3,164 :—

ADVERTING to G. O., No. 2,805, under date the 3rd instant, I have the honor to report that the roof ventilators referred to in paragraph 6 of the Proceedings of the Board of Revenue, No. 2,579, of the 12th September 1874, communicated with the Government Order above quoted, had been proposed by Lieutenant-Colonel R. A. Roberts, R.E., but of course cannot be introduced into a standard design without the approval and sanction of the Government.

2. As regards the Irrigation projects referred to in paragraph 7, I beg to state that the Executive Engineer, Dindigul Range, has already been called upon to submit a report in detail on these. I have lately been out in this taluq with Mr. Bliss, and consider many of his suggestions can be carried out with very little professional assistance. Two Surveyors are required for this purpose to take levels, etc., and I beg to recommend Rupees 150 a month be sanctioned for six months as a special establishment for this taluq. I have had no Overseer in it for months, as Mr. Williams remains away sick and the taluq appears never to have had much attention paid to it, I am compelled therefore to apply for some assistance to avoid further loss to Government.

3. Mr. Hawksworth has now again been reminded on this subject.

No. 304. ORDER THEREON, 18th November 1874, No. 3,259.

IRRIGATION, No. 30.
Establishment.

THE Irrigation projects in question appear to be the improvement and regulation of the distribution of the water of the channel which supplies the big tank at Pulney and four others close by. The District Engineer will forward the detailed report now called for from the Range Officer, to the Chief Engineer for Irrigation, with his own remarks in support of the proposal now made to entertain a couple of Surveyors for six months, and Colonel Mullins will dispose of the same as may be necessary.
