Dated	14-4-	~~195~~ . .

Not to be folded or roughly handled

No. 315. Read the following letter from Lieutenant-Colonel J. F. FISCHER, R.E., District Engineer, Madura, to Colonel G. W. WALKER, R.E., Secretary to Government, Public Works Department, dated Madura, 22nd March 1875, No. 5,279 :—

WITH reference to paragraph 2 of my letter, No. 5,112, under date the 13th instant, I have the honor to state that the Overseer in charge of Operations, Paumben, has, in his letter No. 124, of the 11th idem, reported that as the plans of the original hand-dredge referred to will have to be drawn out in future, and as this will require close application to desk which he will be unable to do till the season for blasting will expire, about the middle of May next, he requests, therefore, that he may be allowed a Draughtsman for a short period who may make out the fair from rough diagrams that he may give him.

2. Mr. Fonseca further reports that at present, in addition to his legitimate work, he is also engaged in plotting the sections called for in G. O., No. 179, of 21st January 1875, which, owing to the bad state of the weather, he was unable to work till the 9th of this month.

3. Under these circumstances, I request that Government will be pleased to sanction the entertainment of a temporary Draughtsman for a period of one month on a salary of Rupees 80 per mensem, and to debit the cost to the allotment for the maintenance of the Paumben channel, or to such other service as the Government may deem expedient in the matter.

4. Paumben is a very expensive place to live at, and any man going there will require to be well paid for so short a time; a considerable saving has been effected in the dredge work, so that provision for this duty can be easily provided from the savings on maintenance.

No. 316. ORDER THEREON, 14th April 1875, No. 1,010.

ESTABLISHMENT, No. 25.

As the decision on the question of the construction of another dredge will depend in a great measure on the results of the past operations as exhibited by the sections under preparation, the engagement of a special Draughtsman to prepare the detailed drawing of the machinery is unnecessary at present.

(True Extract.)

Colonel, R.E.,
Secretary to Government.

Madras.

Sir,

With reference to para 2 of my letter No 5112 under date the 13th instant, I have the honor to state that the overseer in charge of operations Paumben has, in his letter No 124 of the 11th Idem, reported that as the Plans of the original Hand Dredge, referred to, will have to be drawn out in future, and as this will require close application to desk which he will be unable to do till the season for blasting will expire, about the middle of May next, he requests therefore that he

may be allowed a Draftsman for a short period who may make out the fair from rough diagrams that he may give him.

2. Mr Fonseca further reports that at present in addition to his hydrometric work he is also engaged in plotting the Soundings, called for in G.O. No 179 of 21st January 1875 which owing to the bad state of the weather he was unable to work till the 9th of this month.

3. Under these circumstances I request that Government will be pleased to sanction the entertainment of a Temporary Draftsman for a period of one month on a Salary of Rs 80 per mensem, & to debit the cost to the allotment for the maintenance of the Paumben Channel

or to such other service as the Govern
may deem expedient in the matter.

4. — Paumben is a very expensive
place to [illegible] and any man going
there will require to be well paid for
a short time a considerable saving has
been effected in the Dredging work so that
provision for this duty can be easily provided
from the savings of Maintenance.

I have the honor to be
Sir
Your most obedient servt.

Lieut. Tinckler Scott. Coll. Engs.
District Engineer of Madura
