Public Works DEPARTMENT

G.O. No.	1547	Press
B.P. No.		Mis.
Dated	2-6-	C875 195

Not to be folded or roughly handled

*Proceedings of the Madras Government, Public Works Department,
2nd June 1875.*

No. 56. Read the following letter from R. E. NORFOR, Esq., Executive Engineer, in charge District Engineer's Office, South Arcot, to Colonel G. W. WALKER, R.E., Chief Engineer, Public Works Department, dated Camp at Ammapet, 12th April 1875, No. 6, (through the Controller of Public Works Accounts):—

IN continuation of my No. $\frac{D. A.}{3}$, of 2nd instant, I have the honor to submit copy

1 Copy of letter.

1 Revised balance return.

2 Copies of lists of articles missing and in excess.

2 Copies of transfer certificates.

of my No. 606, of 5th March 1875, to the address of District Engineer, together with revised return of tools, &c., in No. 3 or Virdachellum Range, for the half-year ending 30th September 1874.

2. From this it will be observed that there are still several articles missing and some found in excess of what were shown in previous balance returns.

3. From the records in this office and in the range it is observed that Mr. Bell gave over charge of the range to Conductor Wiffen on the 14th June 1873, and that in the transfer certificate submitted by them (copy forwarded herewith) no mention whatever was made of any deficiency or excess of scientific instruments or tools in the range. But subsequently in a letter, No. 217, of 27th August 1873, in reporting on the inefficiency of the Range Draftsman, Mr. Wiffen alluded indefinitely to want of instruments in the range store, and complained of the delay on the part of the Draftsman in compiling lists of the same received from the Overseers. Again in his No. 223, of 1st September 1873, the same officer applied for permission not to pass the Draftsman's pay for August 1873, until he had accounted for all mathematical instruments under his charge, as he, Mr. Wiffen, had reason to think there was a large deficiency as shown in the half-yearly returns. This permission was granted in this office No. 696, of 3rd September 1873, with orders to send in a full report on the subject; also the Draftsman's written explanation for any deficiency. It does not appear, however, that any other formal report or any list of missing articles was ever sent to this office.

4. The omission in the transfer certificate to the allusion of the missing articles Mr. Wiffen states must be due to an oversight, or that he can only account for it by his reporting the same before, which does not appear to be the case. He also states that, with the exception of a few perishable articles, he had the information from Overseers, &c., where all the instruments, &c., were, and denies having at any time given any instrument or tool of any kind to any Overseer without the Draftsman being present and a receipt taken for the same.

5. Supervisor Mr. Hicken took over charge of the range from Mr. Wiffen on the 4th October 1873, and the missing articles were not then also mentioned in the transfer certificate submitted, nor was any mention made of the same in balance return of tools for the half-year ending 30th September 1873, or in the certificate appended thereto which are now in the Controller's Office, and which were submitted by

Now Vector Iron rolling bridge

*Proceedings of the Madras Government, Public Works Department,
2nd June 1875.*

Mr. Hicken with his No. 373, of 17th December 1873; but this officer admits in his No. 426, of 9th February 1874, that the tools, &c., were not personally examined by him as the return was due before he took charge, and considered that the tools, &c., should have been examined by his predecessor, who however examined only the mathematical and scientific instruments.

6. The balance return for the half-year ending 31st March 1874 was submitted by Mr. Hicken on the 26th May 1874; in this also no allusion was made to any deficiency or excess, and from the certificate which accompanied it, and which is in the Controller's Office, one could only come to the conclusion that every thing was correct, with the exception of a few trifling omissions which were pointed out to Range Officer directing him to recover all tools lent to contractors; and the return was passed on to Controller.

7. On my taking charge of the range in August 1874, I found by counting the articles in the Range Office, and summing up the totals in the Overseer's Returns, that there were large excesses and deficiencies in several items; and on Mr. Hicken being asked of the cause of the same, he stated that, when he took over charge of the range in October 1873, he was informed by Mr. Wiffen that he had personally examined all instruments and scientific stores in the range, and these articles were duly placed in the possession of the Range Draftsman. As regards ordinary stores, manmooties, pick-axes, &c., he stated that the returns of Overseers were not to be entirely relied upon. This statement is contradictory to his certificate appended to the balance return for the half-year ending 31st March 1874, and it would appear that proper care was not taken in the preparation of that or the preceding returns, nor were the articles properly examined before. I found, in fact, that instruments reported to Government as destroyed and noticed in G. O., No. 2,514, of 15th October 1873, were continued to be borne of the return as if they were still in the range.

8. The draftsman in his explanation states that from the time of Mr. Hawks-worth up to that of Mr. Hicken the transactions in connection with tools, &c., were not specially entrusted to him, nor was he kept informed of what were received and how they were disposed of by Range Officers.

9. It must be on the whole observed that the transactions under Tools and Stores were not altogether regular and correct. I have taken every means to ascertain the cause of the deficiencies and excesses. I have personally examined all tools and instruments, which latter I caused to be brought to head-quarters and re-issued after examination. I found instruments, tapes, and chains with maistries and people who had no business with them, and who had never given any receipt for them, and cannot satisfactorily explain how or when they came by them.

10. Under excesses three iron rails, each 12 feet, are shown. This appears to be a mistake. It is observed that 440 rails were supplied in 1857-58, and this number was shown in the returns till 1872-73; from 1873 only 436 have been brought on the returns, the remaining four having been reported as lost: this report is not forthcoming. It is, however, evident that the three rails now shown as in excess must be three of the four deducted from the returns since 1873.

11. Two lists showing the book value of the articles missing and in excess are also submitted herewith.

*Proceedings of the Madras Government, Public Works Department,
2nd June 1875.*

12. This letter is forwarded through the Controller as the original balance return is in his office, and that he may, if necessary, compare it with the revised one and send in the certificates alluded to herein.

No. 791.

FORWARDED, with accompaniments, to the Chief Engineer, Public Works Department.

2. The revised return of Tools and Plant for the half-year ended 30th September 1874 of the Virdachellum Range of the South Arcot District has been compared with the original received in this Office on the 20th January 1875, and the missing and excess articles duly noted. The balance returns* with certificates for the previous half-years and the original return for the half-year ended 30th September 1874, are also forwarded for reference.

1 Copy of letter from the Executive to the District Engineer, No. 606, dated 5th March 1875.
1 List of missing articles.
1 " " excess
2 Copies of Transfer Certificates.
1 Revised Balance Return for the half-year ended 30th September 1874.
* 2. For the half-year ended 30th September 1873 and 31st March 1874.
1 Original Return for the half-year ended 30th September 1874.

FORT ST GEORGE,
15th May 1875.

(Signed) L. CONWAY-GORDON, Captain, R.E.,
Controller of Public Works Accounts.

No. 57. ORDER THEREON, 2nd June 1875, No. 1,547.

ACCOUNT, No. 2.

A REPORT made by the Officer in charge of Virdachellum Range, South Arcot District, that certain scientific instruments and tools were missing, having led to a careful examination of all the instruments and tools in the range, it was discovered, as reported by the Executive Engineer in charge of the district, in the above letter, that articles to the value of Rupees 319-1-0 were missing, and others to the value of Rupees 391-5-0, which were not shown in the Range Returns, were forthcoming.

2. It is evident that very great laxity has prevailed both in preparation of the returns of tools, &c., and in the issue of transfer certificates when the officers in charge of the range were changed. It is shown that this has been the case for some time past, as Mr. Norfor states that instruments which were reported to Government as destroyed in October 1873 continued to be borne upon the returns of the range, and both Conductor Wiffen who took charge of the range in June 1873, and Mr. Supervisor Hicken who relieved him in October 1873, must have submitted incorrect returns.

3. As however it appears that the loss of some of the articles now missing may have been noticed before, and others may have been fairly worn out, the Honorable the Governor in Council sanctions their being struck off the returns of the range, but he takes this opportunity of warning all officers of the department that they will in future be held personally responsible for the instruments and tools shown in the returns submitted by them. The responsibility cannot be shifted, as it has been

Now for Iron rolling benches

Proceedings of the Madras Government, Public Works Department,
2nd June 1875.

attempted to be in this instance, on any member of the office establishment, nor can it be evaded by any alteration of the wording of the transfer certificate. It is the duty of every Range Officer to satisfy himself of the correctness of the returns submitted by him, and he will be held liable for any loss that may occur by his dereliction of such duty.

From The Executive Engineer
No. 3 Range S. Arcot
To The District Engineer
S. Arcot

Sir

Encls: 4

2 Returns

1 Marble Book

1 Explanation

Agreeably to the instructions con-
-tained in your No. 1666 of the 30th January last
I have now personally checked the correct-
-ness of the scientific Instruments and Tools
in the Range and revised them to the se-
-veral Orders, taking from them fresh receipts
for the same, and I have now the honor to
submit a revised Return of the Tools ~~now~~
in the Range, this shows the following articles
to be missing viz:

1. Circumferenter with stand

2 Tapes measuring 100 ft

5 do do 50 ft.

1 do do 25 ft.

2 Mathematical Instrument Boxes 3rd sort

3 Pens drawing spare

1 Ruler parallel 24 inches

1 do do 18 inches

1 Ruler Ivory edge 12 inches

1 do Ebony 24 inches

1 do do 18 inches

1 Protractor Ivory rolling 6 inches

report fully on any deficiency there may be -
Nothing further was heard from Mr. Wiffen
on the subject and in October 1873 Mr. Wiffen
gave over charge of the Range to Mr. Hickson
who held it till the 13th August 74; during
this period this latter officer never reported
any deficiency or excess, and in fact from his
Certificate which accompanied the Balance
Returns of Tools for half year ending 31st
March 1874 it would appear that everything
was right.

3 Mr. Wiffen refers to a marble
covered demisize Book containing officer's
copy of half yearly Returns of Tools &c in
which he states he entered those articles that
were missing and those that were with the
Overseers I herewith forward this book and
as stated it will be seen that Mr. Wiffen
in his own hand-writing has recorded
such notes - yet it is strange that neither
in the transfer certificate between Mr. Bell
and Mr. Wiffen, nor subsequently between
Mr. Wiffen and Mr. Hickson is there any men-
tion made of missing instruments; in fact
these Certificates go to show that all was -
right.

4. The Draftsman whose salary was
ordered to be stopped till he had accounted
for the Instruments &c appears on the 8th Oct.
1873 (4 days after taking charge) to have been
paid by Mr. Hickson £30 keeping £10 -
by what authority this payment was made,
or under what circumstances, is not known,
and the £10 retrenched has never been re-
ported or since paid to him.

5 The Draftsman's explanation such
as it is, I now send for your information -
he pleads that Range Officers have been
in the habit of issuing Tools &c to Maistries
and subordinates in the Range without his
knowledge - how far this is true I cannot tell
but I have had hard work in hunting
up the Instruments &c in the Range, and
found that Temporary Maistries were in po-
-session of Instruments which were never
brought on the Returns of the Overseers in-
-der whom they were serving, issued ab-
-solutely direct from the Range stores and
altogether lost sight of. One Maistry Gopala-
-sawny has a prismatic compass, chain, Tape,
another, a Perambulator &c on. - these
men say they got direct from the Range
Officers but forget names; I have I think
now

now got together every thing I can lay my hands on, and this to some extent reduces the list of missing articles I sent in when I first took charge of the Range and before I had time to personally examine them.

6. I found also the articles reported destroyed and noticed in G.O. No 2514 of 15th October 1873 still brought in the half yearly returns, and entered in Column "as counted," showing with what little care these returns had been prepared:

7. I now submit a correct Return of Tools in the Range and beg to state that I shall hold myself responsible for these only, and no more, and beg the orders of Government be obtained to omit the missing articles from future Returns.

I have the honor to be, Sir,
Yours faithfully,
Sd/ R. E. Norfor

W.
APCOT. No.

Camp *Camp Ammarah*
Dated *12th April* 1875.

From
The District Engineer,

South Arcot.

To
The Chief Engineer D. P. W.
also the Controller of P. & A. Accounts

asures.
of letter
of Balance
Return
of List
missing
of items
duplicate

Sir,
In continuation of my No $\frac{D}{3}$ A
of 2nd instant, I have the honor to
submit copy of my No 606 of 5th March
1875 to the address of District Engineer
together with revised Return of Tools
in No 3 or Virdachellum Range for the
half year ending 30th September 1874.

2. From this it will be observed
that there are still several articles missing
and some found in excess of what were
shown in Previous Balance Returns.

3. From the records in this office
and in the Range it is observed that
Mr. Bell gave over charge of the Range
to Conductor Miffen on the 11th June
1873 and that in the Transfer Certificate
submitted by them (copy forwarded herewith)
no mention whatever was made of any
deficiency or excess of Scientific Instrument.

or Tools in the Range. But subse-
quently in a letter No 217 of 27th August 1873
in reporting on the inefficiency of the
Range Draftsman, Mr. Wiffen alluded
indefinitely to want of Instruments in
the Range store, and complained of the
delay on the part of the Draftsman in
compiling lists of the same received from
the Overseers. Again in his No 223 of
1st September 1873 the same officer ap-
plied for permission not to pass the
Draftsman's pay for August 1873, until he
had accounted for all Mathematical
Instruments under his charge, as he
Mr. Wiffen had reason to think there
was a large deficiency as shown in the
Half yearly Returns. This permission was
granted in this office No 696 of 3rd Sept
1873 with orders to send in a full report
on the subject also the Draftsman's written
explanation for any deficiency. It does
not appear however that any other for-
mal report or any list of missing articles

was ever sent to this office.

4 The omission in the Transfer
Certificate to the allusion of the missing
articles Mr. Wiffen states must be due to
an oversight, or that he can only account
for it by his reporting the same before, which
does not appear to be the case. He also
states that with the exception of a few peris-
able articles he had the information
from Overseers ~~for~~ where all the instruments
were and denies ~~him~~ having at any
time given any instrument or tool of
any kind to any Overseer without the
Draftsman being present and a receipt
taken for the same.

5 Supervisor Mr. Hickew took over
charge of the Range from Mr. Wiffen on the
4th October 1873 and the missing articles were
not then also mentioned in the Transfer
Certificate submitted; nor was any men-
tion made of the same in Balance Returns
of Tools for the half year ending 30th Sept
1873 or in the Certificate appended thereto
which are now in the Controller's Office and

and which were submitted by Mr. Hickman with his No 373 of 17th Decr. 1873; but this Officer admits in his No 426 of 9th Feb^y 1874 that the Tools &c were not personally examined by him as the Return was due before he took charge, & considered that the Tools &c should have been examined by his predecessor, who however examined only the Mathematical and scientific Instruments.

6. The Balance Return for the half year ending 31st March 1874 was submitted by Mr. Hickman on the 26th May 1874; in this also no allusion was made to any deficiency or excess and from the Certificate which accompanied it and which is in the Controller's Office, one could only come to the conclusion that every thing was correct with the exception of a few trifling omissions which were pointed out to Range Officer directing him to recover all tools lost to Contractors; and the Return was passed on to Controller.

7. (Summing charge of the Range in August 1874) I found by counting the articles in the Range Office and Storehouses the totals in the Brewer's Returns, that there were large excesses and deficiencies in several items, and as Mr. Hickman being asked of the cause of the same, he stated that when he took over charge of the Range in October 1873 he was informed by Mr. Welford that he had personally examined all Instruments and scientific stores in the Range and that articles were duly placed in the possession of the Range Draftsman; as regards ordinary stores - Manicotties, Pick-axes &c, he stated that the Returns of Brewer were not to be entirely relied upon. This statement is contradictory to his Certificate appended to the Balance Return for the half year ending 31st March 1874 and it would appear that proper care was not taken in the preparation of that or the preceding Returns; nor were the articles properly examined before; I found in fact that Instruments reported to have been as destroyed and noticed in G.O. No 2514 of 15th Octob^r 1873 were continued to be borne of the Return as if they were still in the Range.

8 The Draftsman in his explanation states that from the time of Mr. Hawks worth up to that of Mr. Hicken the transactions in connection with Tools &c. were not specially entrusted to him nor was he kept informed of what were received and how they were disposed of by Range Officers

9 It must be on the whole observed that the transactions under Tools and Stores were not altogether regular and correct. I have taken every means to ascertain the cause of the deficiencies and excesses. I have personally examined all Tools and Instruments which latter I caused to be brought to Head Quarters and reissued after examination. I found Instruments Tapes and chains with Maistries and people who had no business with them, and who had never given any receipt for them, and cannot satisfactorily explain how or when they came by them.

10 Under excesses 3 Iron rails each 12 ft. are shown. This appears to be a mistake. It is observed that 440 rails were supplied in

in 1857-58, and this number was shown in the Returns till 1872-73; from 1873 only 436 have been brought in the returns, the remaining 4 having been reported as lost. This report is not forthcoming. It is however evident that the 3 rails now shown as in excess must be 3 of the 4 deducted from the Returns since 1873.

11 Two lists showing the Book values of the articles missing and in excess are also submitted herewith.

12 This letter is forwarded through the Controller as the original Balance Return is in his office, and that he may, if necessary, compare it with the revised one and send in the certificate alluded to herein.

I have the honor to be

Proceedings of the Madras Government

Under date the 16th 1875

Read the following:-

From
The District Engineer } (No. 12 Q & 12th April 1875)
South Arcot }

G.O. no: 1547 of 2nd June 1875

A report made
by the Officer in charge
of Virudachellam Range,
South Arcot District,
that certain Scientific
Instruments and Tools
were missing, having led
to a careful examination
of all the Instruments
and Tools in the Range,
it was discovered, as
reported

reported by the Executive Engineer in charge of the District, in the above letter, that articles to the value of Rs 319-1- were missing and others to the value of Rs 391-5- which were not shown in the Range Returns, were forthcoming.

It is evident that very great laxity has prevailed both in preparation of the Returns of Tools &c, and in the issue of Transfer certificates when the Officers in charge of the Range were changed. It is shown that this has been the case for some time

6
time past as Mr. Morfor states that Instruments which were reported as destroyed in October 1873 continued to be borne upon the Returns of the Range and both conductor Wiffen who took charge of the Range in June 1873 and Mr. Supervisor Hicken who relieved him in October 1873 must have submitted incorrect returns.

As however it appears that the loss of some of the articles now missing may have been noticed before, and others may have been fairly

fairly worn out, the
Honble the Governor in
Council sanctions their
being struck off the Returns
of the Range, but he takes
this opportunity of warning
all Officers of the Dept
that they will in future
be held personally res-
ponsible for the Instruments
and Tools shewn in the
Returns submitted by
them. The responsibility
cannot be shifted; as it
has been attempted to be
in this instance, ~~as~~ any
member of the Office
establishment, nor can
it be evaded by any
alteration of the wording
of

14
of the Transfer Certificate
It is the duty of every
Range Officer to satisfy
himself of the correctness
of the Returns submitted
by him, and he will be
held liable for any loss
that may occur by his
dereliction of such duty.
