DISTRICT ENGINEER'S OFFICE, GODAVERY.
DOWLAISHWARUM, 13th May 1875.
Dispt 14th 9.

No. 538

From

Major J. Beatty R.E.

District Engineer
Godavery District

To

Colonel J. Mullins R.E.

Off^{ce} Secretary to Government D. P. W.
MADRAS

SIR,

I have the honor to report, as already telegraphed, that Mr Vanstavern reported, under date 6th May, that he had met with a two feet seam of coal at about 89 feet in his ninth borehole.

2. At the close of last season you will remember he found $4\frac{1}{2}$ feet of coal in his 4th boring; this season he has worked in 5 new boreholes Nos 5, 6, 7, 8 and 9.

3. Some time ago he came upon some coal and shale in one of the holes, but I did not consider this sufficiently important for special report.

4. At the time of his last report the new holes had been carried down to the following

following depths: -

No 5 - 19 -

6 - 190

7 - 211

8 - 208

9 - 91

5. He was fairly provided with tools and stores, and may possibly yet make some more important discovery before the work is stopped by the rains.

I have the honor to be,

Sir,

Your most obedient Servant

L. Peatty. Major R.E.
District Engineer Godavery.
