The purpose of this study is to
 determine the effect of the
 treatment on the growth of the
 plants. The results of the study
 are as follows:

[Faint handwritten notes, possibly bleed-through from the reverse side.]

[Faint handwritten notes, possibly "D. ..."]

The first of these is the fact that the
 government has been unable to raise the
 necessary funds to meet its obligations.
 This is due to a number of factors, including
 the fact that the government has been unable to
 collect the necessary taxes, and the fact that
 the government has been unable to borrow the
 necessary funds from the international market.
 The second factor is the fact that the
 government has been unable to implement the
 necessary reforms to the economy. This has
 led to a number of problems, including
 inflation, unemployment, and a general
 decline in the standard of living. The third
 factor is the fact that the government has
 been unable to maintain a stable political
 environment. This has led to a number of
 problems, including corruption, and a
 general lack of confidence in the government.
 These factors have all contributed to the
 current economic crisis. The government must
 take immediate action to address these
 problems, or the crisis will continue to
 worsen.
