Not to be folded or roughly handled

*Proceedings of the Madras Government, Public Works Department,
27th July 1875.*

Read the following papers —

No 732. Proceedings of the Board of Revenue, dated 9th July 1875, No 1,907.
Read the following Proceedings of the Madras Government, dated 22nd May 1875,
No 1,417, Public Works Department —

ABSTRACT — *Statement of Revenue from Irrigation Works of the Cauvery Delta, Tanjore District, for Fasli 1283 (1873-74)* — The Note by the Chief Engineer for Irrigation on Proceedings of the Board of Revenue forwarding —, communicated to the Revenue Department with observations

As surmised by the Chief Engineer for Irrigation, the water-tax separately shown is not in the case of wet lands the charge for water apart from the dry assessment of the land itself. It simply represents the charge for water on dry lands irrigated, and hence the very low rate compared with the total area irrigated.

2. The same remark applies to the charge on account of second crop. The charge on wet lands, which is half the assessment, is shown under assessment, and the water-rate is merely the charge on second crop grown on dry lands irrigated.

3 When the statement was prepared, it was understood that the entire revenue, assessment, and water-rate was to be regarded as revenue due to irrigation, and the Board still think that this is the proper course. The necessary alterations, however, will be made on the receipt of Government Order on the Board's Proceedings, dated 19th June 1875, No 1,698.

4 The Collector will be requested to report whether a statement showing the revenue under *each branch* of the Cauvery and Vennar can be readily prepared for Fasli 1283 and for all the previous years, and, if so, within what time. If not, he should suggest measures for securing their early preparation.

5 The Board observe that the statements called for by the Controller of Public Works Accounts in view to enabling him to prepare capital and revenue accounts, do not require the separate exhibition of the revenue under each branch of each work. If the details are necessary, it is desirable that intimation should be given without delay as to what branches are required to be separately shown. Considerable time, labor, and correspondence will be saved if the Chief Engineer is required to prescribe forms, and to state clearly what is wanted, when any information is required from the Revenue Department

Acting Secretary

No 822.

MEMORANDUM.

No. 732-A.

With reference to paragraph 5 of the Proceedings, No. 1,907, dated 9th July 1875, it appears to be necessary to remark that the form to be used for the revenue statements of the Cauvery Delta is that prescribed for the Godavery, Kistna and other systems of irrigation. In Tanjore, rivers occupy the place of canals in the

Northern Deltas, so that the branches of the Cauvery and Vennar, which are the two great sources of irrigation in the Cauvery Delta, require to be entered in the statements in the order in which they take off from these rivers

2 It has been arranged that the irrigation under the Upper Anicut in the Cauvery Delta is to be divided into the two sections irrigated by the Cauvery and Vennar, respectively, and to one or other of these sections all expenditure is to be debited in the accounts

OCTACIMEND,
23rd July 1875

(Signed) JOHN MULLINS, Lieut-Colonel, R.E.,
Officiating Chief Engineer

No 733

ORDER THEREON, 27th July 1875, No 2,165

IRRIGATION, No 68-A

ORDERED that these Proceedings be
communicated to the Board of Revenue

(True Extract)

Revenue Department.

Proceedings of the Board of Revenue
dated 9th July 1875.

Read Proceedings of
the Madras Government, Pub-
lic Works Department dated
22nd May 1875 at 1417, com-
municating to the Revenue Depart-
ment with observations the
note by the Chief Engineer for
Corrigation on Proceedings of
the Board forwarding Statement
of Revenue from Corrigation
Works of the Cauvery Delta, in
Tanjore District, for Fiscal
12 P3 (1873-74).

as submitted by Chief
En-

Engineer for Irrigation, the Water tax separately shown is not in the case of wet lands the charge for water apart from the dry apportionment of the land itself. It simply represents the charge for water on dry lands irrigated and hence the very low rate compared with the total area irrigated.

2. The same remark applies to the charge on account of second crop. The charge on wet lands which is half the apportionment is shown under apportionment and the water rate is merely the charge on second crop grown on dry lands irrigated.

3. When the statement was prepared, it was understood that the entire revenue, apportionment and water rate, was to be regarded as revenue due to irrigation and the Board still think that this is the proper course. The necessary alterations however will be made on the receipt of G. O. on the Board's Proceedings dated 19th June 1895 and 1898.

4. The Collector will be requested to report whether a statement showing the revenue under each branch of the Canyons and Venues can be readily prepared for Fushi. 12 & 3 and for

On all the previous years, and if
W. so within what time. If the
is should suggest measures for
the running their early preparation
the 5. The Board observe that
it the Statements called for by the
the Controller of Public Works
is - counts in view to enabling him
low to prepare Capital and Revenue
to accounts do not require the sep-
2. = rate exhibition of the revenues
= p under each branch of each
of work. If the details are neces-
la = say, it is desirable that inter-
= = mation should be given without
= = delay as to what branches are
-ly required to be separately shown.
g, considerable time, labor, and

Correspondence will be saved
if the Chief Engineer is required
to prescribe forms, and to state
clearly what is wanted, when any
information is required from the
Revenue Department.

Memorandum.

With reference to para 5 of the 1/5
(2) according to 1904, dated 7 July 20.
1896, it appears the necessary to
remark that the form the used
for the Revenue statements of the year
canary Delta is that prescribed in
for the Godavari. Krishna and other
systems of irrigation. In Sanjoni
rivers occupy the place of Canals
in the Godavari Delta, so that
the branches of the cany and
Tonnant, which are the two great
sources of irrigation in the
canary Delta, require the entered
in the statements in the order in
which they take off from these
rivers.
