Public Works DEPARTMENT

G.O. No.	2338	Press
B.P. No.		Mis.
Dated	13-8-	6875-195-

Not to be folded or roughly handled

*Proceedings of the Madras Government, Public Works Department,
13th August 1875.*

No. 231. Read the following letter from Major J. BEATTY, R.E., District Engineer, Godavery, to Major J. O. HASTED, R.E., Officiating Chief Engineer for Irrigation and Joint Secretary to Government, dated Dowlaishweram, 9th July 1875, No. 1,114.

WITH reference to G. O., No. 2,344, of 22nd September 1873, I have the honor

Amalapur.
Nursapur.
Tanuku.
Yernagudiem.
Ellore.

to forward, herewith, five statements showing the remissions granted in Faslies 1281 and 1282, or 1871-72 and 1872-73, in the villages of the taluqs noted in the margin, with notes in the remarks column as to

the steps proposed to be taken to prevent a recurrence of such remissions.

2. The total of the remissions granted in Fasli 1281 in the Bheemaveram Taluq was only Rupees 5-5-1, which is insignificant. The remissions for that taluq in Fasli 1282 amounted to Rupees 27-15-5 for deficiency of water, which is also insignificant, and Rupees 6,662 on account of "excess of water." In that Fasli there were two extraordinary floods in the Yerracalwa, with reference to which I would invite your attention to my predecessor's letter on the subject, No. 2,566, dated 18th October 1872. With such floods the swamping of the lands under notice was unavoidable; the contemplated improvements to the Yanamaduru will improve matters, but heavy floods of long duration in the Yerracalwa will always do injury to some of the low lying lands of that taluq.

3. The remissions on account of insufficient supply granted in the Rajamundry and Peddapur Taluqs amounted to Rupees 24,435 in Fasli 1281, and Rupees 10,648 in Fasli 1282. These remissions were due to insufficient rain fall.

4. The remissions granted in the Ramachendrapur Taluq in the above Faslies will be reported on at an early date.

No. 232. ORDER THEREON, 13th August 1875, No. 2,338.

IRRIGATION, No. 10.

Amalapur.
Yernagudiem.
Tanuku.
Nursapur.
Ellore.

WITH his letter above recorded the District Engineer forwards statements of remissions of land assessment and water-tax granted during Faslies 1281 and 1282 (1871-72 and 1872-73) in five taluqs of the Godavery District.

2. *Amalapur Taluq.*—The remissions in this taluq were as shown below:—

					Fasli 1281. RS.	Fasli 1282. RS.
Land Assessment	...	...	...	...	—	278
Water-tax	...	...	...	...	716	2,133
				Total	716	2,411

The remissions are chiefly due to unavoidable causes.

3. *Yernagudiem Taluq.*—In respect of a large proportion of the remissions of both years in this taluq, it has not apparently been ascertained whether they are connected with (caused by) defects in tanks or channels from which the lands receive

*Proceedings of the Madras Government, Public Works Department,
13th August 1875.*

their supply of water. As taken from the list, in connection with the notes in the remark column, the remissions may be classified as shown below :—

	Fasli 1281. RS.	Fasli 1282. RS.
Remissions ascertained not to be due to defects in works	236	43
Remissions due to defects in tanks or channels	3,041	1,168
Remissions, the cause of which has not been actually ascertained	2,632	2,276
Total remissions, Yernagudem Taluq	5,909	3,487

Inspections of the works which have not been yet examined should of course be made as early as practicable, and estimates brought forward for the necessary repairs or improvements. It is only the result of actual examination which can be held to settle the questions involved satisfactorily.

4. The remedies where ascertained are usually stated to be minor masonry works to the tanks or repairs to the bunds.

5. *Tanuku Taluq.*—The remissions in this taluq during both the years under notice were trifling. In Fasli 1281 they in round numbers amounted to Rupees 800, and in Fasli 1282 to Rupees 844. In the former case they were entirely due to insufficient, and in the latter to excessive, rainfall and consequent floods and breaches in the canal embankments. Remedies have either been applied or are designed to prevent a recurrence of the latter class of evils.

6. *Nursapur Taluq.*—In Fasli 1281 the remissions were also insignificant, amounting on the whole to only Rupees 312, including both kist and water-tax. In Fasli 1282 they amounted to Rupees 5,635, viz. :—

	RS.
Kist for crops destroyed by water, &c.	1,107
Water-tax remitted for excess of water	4,287
Do. for insufficiency of water	242

The loss as may be supposed was chiefly due to defects in the drainage arrangements of the delta, but in some cases to the want of improvements in the canals themselves. In almost every instance the subject has been considered, and estimates have been supplied or works have been already carried out by way of remedy.

7. *Ellore Taluq.*—In this taluq the remissions amounted in Fasli 1281 to Rupees 8,513, and in 1282 to Rupees 7,551, as shown below :—

	Fasli 1281. RS.	Fasli 1282. RS.
Waste Land, wet	7,708	244
Dried crops	455	183
Crops destroyed, wet land	...	722
Teerwa Cummi	...	10
Water-tax	350	6,392
Total	8,513	7,551

The distinction between remissions granted on account of crops destroyed by want of water and by excess of water is not clearly maintained, and as regards water-tax is in

*Proceedings of the Madras Government, Public Works Department,
13th August 1875.*

fact not shown at all. The headings used by the Revenue Authorities for these returns furnished to officers of the Public Works Department should be strictly uniform throughout every district, and as far as practicable self explanatory. Native terms should not be used. Apparently the remissions are intended to be classed under heads which might be rendered—

A.—Land Assessment Remission.

- (1.) Irrigable land left waste.
- (2.) Irrigated crops destroyed by absence of water.
- (3.) Do. do. by excess of do.

B.—Water-tax Remission.

- (4.) Irrigable land left waste or crops destroyed from scarcity of water.
- (5.) Do. do. do. from excess of do.

and probably there would be no difficulty in obtaining from subordinates entries so classified. It is further desirable that the percentage on the demand which the remissions represent should be stated.

8. Little real information is given by the Range Officer regarding the connection of the remissions with the condition of the tanks and canals. Out of 181 cases of remissions only 12 have been investigated by aid of actual inspection, and, on the whole, there is apparently insufficient knowledge of the general condition of the minor irrigation works in the range. Remissions to the extent of Rupees 897 only during two years in question have seemingly been traced to defects in tanks.

9. As regards the Bheemaveram Taluq, which is referred to in the District Engineer's letter, it appears that the considerable remissions of Fasli 1282 were caused by extraordinary floods in the Yerracalwa, and that loss on such occasions is unavoidable. In Rajamundry and Peddapur Taluqs the remissions stated to amount to Rupees 24,435 in Fasli 1281 and Rupees 10,648 in Fasli 1282 were caused by abnormally small rainfall.

10. The following is a summary of the remissions under all heads in the several taluqs for which statements have been supplied, or which are referred to in the covering letter of the District Engineer :—

	Fasli 1281. RS.	Fasli 1282. RS.
Amalapur Taluq	716	2,311
Yernagudem „	5,909	3,487
Tanuku „	800	844
Nursapur „	312	5,635
Ellore „	8,513	7,551
Bheemaveram „	5	6,690
Rajamundry „	24,435	10,648
Peddapur „	...	...
Total	40,690	37,166

11. If in conducting the conservancy and administration of the irrigation works of the district, the results of the revenue collections continue to be steadily kept in view, expenditure will be directed with much greater certainty of corres-

Proceedings of the Madras Government, Public Works Department,
13th August 1875.

pending returns, but it is necessary that inspection of the works involved should not
be too long delayed.

SIR,

With reference to G. O. No. 2344 of 22nd
September 1873, I have the honor to forward
herewith 5 statements showing the remissions
granted in fushies 1281 and 1282, or 1871-72 and
1872-73 in the villages of the Taluqs noted in

Analapier	_____

the margin, with notes in
the remarks column, as to
the steps proposed to be taken

to prevent a recurrence of such remissions.

2. The total of the remissions granted
in fushi 1281 in the Bheemaveram Taluq
was only Rs. 5-5-1 which is insignificant.
The remissions for that Taluq in fushi 1282
amounted to Rs. 27-15-5 for deficiency of
water, which is also insignificant and
Rupees 6662 on account of "excess of water".

Sir

In that Fusli there were two extraordinary floods in the Yerracalwa, with reference to which I would invite your attention to my predecessor's letter on the subject No. 2666 dated 18th October 1872. With such floods the swamping of the lands under notice was unavoidable; the contemplated improvements to the Yanamaduru will improve matters, but heavy floods of long duration in the Yerracalwa will always do injury to some of the low lying lands of that Talug.

3. The remissions on account of insufficient supply granted in the Rajahmundry and Peddapur Talugs amounted to Rupees 24,435 in Fusli 1281 and Rupees 10,648 in Fusli 1282. These remissions were due to insufficient rain fall.

4. The remissions granted in the Ramachendrapur Talug in the above Fuslies, will be reported on at an early date.

Have the honor to be,
Sir,

Your most obedient Servant
G. Peatly Major R.E.
District Engineer Godavery.

A hand-drawn diagram of a parallel circuit. It consists of two main horizontal wires. The top wire has a light bulb symbol (a circle with a cross) and a switch symbol (an open circle with a diagonal line) connected in series. The bottom wire has a single light bulb symbol. Both branches are connected to a common vertical wire on the left, which represents the power source. The circuit is enclosed in a rectangular box.

Remarks.

State of last season 1873. No remission given in
June 1873. It is therefore probable that the cause of
remission was that the river was low.

Date of last repairs 1873. This tank has been inspected. It is in good order.

Date of last repairs not known. This tank has been inspected. Its hull requires to be raised and sluices are required and estimate for the repairs is being prepared.

Date of last repairs not known. No remission in 1872

Date of last repairs not known. As no remission was given it is probable that it requires no repairs.

Date of last repair 1871. As no permission was given in 1282 it is probable it does not require repair.

Detailed account of Remissions granted in Yernagudem Talug for Fushies 1281-1282.

1. The first part of the document is a list of names and dates, which appears to be a record of some kind. The names are written in a cursive script, and the dates are in a more formal, printed style. The list is organized into columns, with names in the first column and dates in the second column.

2. The second part of the document is a series of handwritten notes or entries. These are written in a cursive script and are organized into a list format. The notes appear to be related to the names and dates in the first part of the document.

3. The third part of the document is a series of handwritten notes or entries. These are written in a cursive script and are organized into a list format. The notes appear to be related to the names and dates in the first part of the document.

4. The fourth part of the document is a series of handwritten notes or entries. These are written in a cursive script and are organized into a list format. The notes appear to be related to the names and dates in the first part of the document.

5. The fifth part of the document is a series of handwritten notes or entries. These are written in a cursive script and are organized into a list format. The notes appear to be related to the names and dates in the first part of the document.

Public Works Dept.
 No. 2338.
 Proceedings of the Madras Government
 Under date the 13th Augt 1875
 Read the following

From
 The Dist. Engineer
 Godavery } (No. 1114 of 9th July 1875)

Statement of remissions
 in Amalapur Taluq
 in Fushies 1281.

8-13-1875
 10/13/1875
 5/7/25

MR 9/8
 The percentage of the demand
 remitted is 10% - no
 proposal can be formed without
 this information MR

Amalapur
 Gernagudem
 Tanuku
 Nuvvapur.
 Ellore.

With his letter
 recorded the
 District Engineer forwards
 statements of remissions
 of land assessment and
 Water tax granted during
 fushies 1281 and 1282
 (1871-72 and 1872-73) in
 five taluqs of the
 Godavery District.

2. Amalapur Taluq. The
 remission.

remissions in this Taluk
were as shown below.

	July 1281 Rs	July 1282 Rs
Land assessment	—	278
Water Tax	710	2133
Total	710	2411

The remissions are chiefly
due to unavoidable causes.

Gernagudem Taluk.

3. In respect of a large
proportion of the remissions
of both years ^{in this Taluk} it has not
apparently been ascertain-
ed whether they are con-
nected with (caused by)
defects in Tanks or channels
from which the lands receive
their supply of water.

As
taken from the list, in
connection with the notes
in the remark column, the
remissions may be classified
as

as shown below.

	July 1281 Rs	July 1282 Rs
Remissions ascertained not to be due to defects in works—	230	43
Remissions due to defects in Tanks or channels—	3041	1108
Remissions the cause of which has not been actually ascertained	2032	2270
Total remissions Gernagudem Taluk	5909	3487

Inspections of the works
which have not been yet
examined should of
course be made as early
as practicable, and
Estimates brought forward
for the necessary repairs
or improvements. It is
only the result of
actual examination which
can be held to settle
the

the questions involved satisfactorily.

4. The remedies where ascertained are usually stated to be minor masonry works to the tanks or repairs to the bunds.

Tamir Talug.

5. The remissions in this Talug during both the years under notice were trifling. In Fuli 1281 they in round numbers amounted to Rs 800 and in Fuli 1282 to Rs 844. In the former case they were ^{entirely} due to insufficient and in the latter to excessive rainfall and

irrigable land left waste or crops destroyed from excess of water.

and probably there would be no difficulty in obtaining from subordinates entries so classified.

It is further desirable that the percentage on the demand which the remissions represent should be stated.

Answer

8. Little real information is given by the Range Officer regarding the connection of the remissions with the condition of the tanks and canals. Out of 181 cases of remissions only 12 have been investigated by aid of actual inspection and on the whole there is apparently

2. apparently insufficient
3. Knowledge of the general
4. condition of the minor
5. irrigation works in the
6. Range. Remissions to
7. the extent of Rs 897 only
8. during two years in question
9. have seemingly been traced
10. to defects in Tanks.

5. 9. As regards the
the Bhémavaram Taluq
the which is referred to in
the District Engineer's
128 letter it appears that
the considerable remis-
sions of Tushli 1282 were
caused by extraordinary
floods in the Gorracalva
of the outlet of the
delta, and that loss
on

the Bhémavaram Taluq is not out of all
proportion to the loss in the other Taluqs

The Gorracalva is an upper
drainage entrenching the
delta at the Bhémavaram
Agri. District.

on such occasions is
unavoidable. In Rajā-
mundry and Piddapur
Taluqs the remissions
stated to amount to
Rs 24,435 in Tushli 1281
and Rs 10,648 in Tushli
1282 were caused by
abnormally small
rainfall.

19. The following is
a summary of the
Remissions under all
heads in the several
Taluqs for which state-
ments have been supplied
or which are referred
to in the covering letter
of the District Engineer

Amalapur

	Fusli 1281 Rs	Fusli 1282 Rs
Amalapur Taluq	716	2311
Gannagudem "	5909	3487
Tanuklu "	800	844
Nursapur "	312	5635
Elluru	8513	7551
Bhuvanavaram "	5	6890
Rajamundry		
Peddapur }	24,635	10,648
Total Rs	40,690	37,166

11. If in conducting the Conservancy and administration of the irrigation works of the District the results of the revenue collections continue to be steadily kept in view expenditure will be directed with much greater certainty of corresponding returns, but

and consequent floods and breaches in the canal-embankments. Remedies have either been applied or are designed to prevent a recurrence of the latter class of evils.

Nursapur Taluq

B. In Fusli 1281 the remissions were ^{also} insignificant amounting on the whole to only Rs 312 including both Rist and Water tax. In Fusli 1282 they amounted to Rs 5,636 viz

Rs 5636

Rist for crops destroyed
by water 8th } 1107
Water Tax remitted for
excess of Water } 4,287
do - for insufficiency of
Water } 242

The

The loss as may be supposed was chiefly due to defects in the drainage arrangements of the Delta, but in some cases to the want of improvements in the Canals themselves. In almost every instance the subject has been considered and Estimates have been supplied or works have been already carried out by way of remedy.

Ellore Taluq.

7. In this Taluq the remissions amounted in Fushli 1281 to Rs 8513 and in 1282 to Rs 7551
as

as shown below.

	Fushli 1281	Fushli 1282
Waste land wet Rs	7708	244
Dried crops—	455	183
Crops destroyed wet land	—	722
Teerwa Summi—	—	10
Water Tax	350	6392
Total. Rupees	8513	7551

The distinction between remissions granted on account of crops destroyed by want of water and by excess of water is not clearly maintained, and as regards water tax is in fact not shown at all. The headings used by the Revenue Authorities for these returns furnished to Officers of

of the D.P.W. should be strictly uniform throughout every District and as far as practicable self explanatory. Native terms should not be used. Apparently the remissions are intended to be classed under heads which might be rendered

A Land Apportionment Remission

1. Irrigable land left waste
2. Irrigated crops destroyed by absence of water.
3. Irrigated crops destroyed by excess of water.

B. Water Tax Remission

4. Irrigable land left waste or crops destroyed from scarcity of water.

Irrigable

but it is necessary that inspection of the works involved should not be too long delayed.
