MADRAS RECORD OFFICE.

Government of Madras.

Public Works DEPARTMENT.

G.O. No. 2575 Press/Mis.

Dated 8 9 1855

Not to be folded or roughly handled

Proceedings of the Madras Government, Public Works Department, 8th September 1875

No 180 Read the following letter from Captain L CONWAY-GORDON, R.E, Controller of Public Works Accounts, to Major-General G W. WALKER, R E, Secretary to Government, Public Works Department, dated Fort St. George, 18th August 1875, No 71 W —

In my letter No 1,111, dated 3rd June 1875, I put forward some general remarks as to the incomplete manner in which abstract estimates for works costing more than Rupees 2,500 were supplied to this office

2. Since then I have had the subject investigated, and I have now the honor to forward, for the information of Government, detailed statements showing all the works in progress for which copies of estimates have, and also those for which copies of estimates have not, been furnished to this office

3 From the abstract of these statements it would appear that the Controller has received copies of estimates for 205 works, aggregating in cost Rupees 46,53,000. For 447 works, aggregating in cost Rupees 1,73,38,000, he has received no estimates In other words, for Public Works expenditure, amounting to about 1¾ crores of Rupees, or nearly £1,750,000, the Controller has not yet been placed in a position to carry out the audit prescribed by Government

4 I should be glad if abstract estimates for these 447 works could be gradually supplied to me In drawing out these estimates care should be taken to see that the particular fund, class, main head and sub-head of account, to which the outlay is chargeable is prominently specified. For convenience of reference I have given in Appendix A a list of all the heads and sub-heads of account recognized by the Government of India, and it is extremely desirable that the exact wording of this classification should be scrupulously followed With regard to the classification of Provincial Works, I must point out that the 'sub-heads' entered are those alone which were pointed out in Resolution by the Government of India in the Public Works Department, No 469-78 A G, of 23rd August 1873, as being absolutely necessary. In that Resolution it was left to Local Governments to determine whether any further subdivision should be made, but as no orders appear to have been passed on the subject, it seems desirable that the classification of Provincial Works should now be taken up and definitely settled by the Public Works Department in communication with other departments concerned The 'grouping' given under the 'sub-heads' I find existing in this office If not absolutely required it might with advantage be done away with, as this minute sub-division complicates the accounts

5 In conclusion I may mention that the fund, class, main-head, and sub-head, to which the outlay is chargeable, is required to be shown as much for small sanctions as for the large ones for which abstract estimates are printed, and that in the case of small sanctions, whether for original works or repairs, such particulars are seldom, if ever, given in the Government order conveying the sanction It would be also convenient if for the smallest estimate a brief distinctive heading of the work were given at the time the sanction is conveyed For instance, taking Estimate 20 of 1875-76, the sanction might be headed

No 181

IRRIGATION, No 19

Account

G O, No. 1,786, dated 28th June 1875, and the memoranda quoted in paragraph 1

ORDER THEREON, 8th September 1875, No 2,573.

THE Government observe that in the orders as per margin full instructions have been given regarding the classification of Irrigation Works and the provision of abstract estimates for the use of the Controller's Office It is understood, however, with regard to the latter, that the printing of repair estimates in the Proceedings of Government while it throws a great deal of extra work on the Press is not of material assistance to the Account Department, and in modification therefore of the Order of the 28th June 1875, No 1,786, the Honorable the Governor in Council is pleased to direct that, for the future, the abstract estimates of Budget Works only as revised and sanctioned shall be printed, and that the Controller's Office shall be furnished with copies of all other agricultural abstract estimates, whether sanctioned by Government or locally by District Officers

2 It will rest with the Controller to see that all estimates transmitted to his office by District Officers contain upon the face of them the required information, and that the headings of all vouchers correspond fully with the estimates with which they are connected.

3 The Government are of opinion that, as regards estimates already sanctioned, copies of those only of which the work provided for will not be completed before the 30th September next should be furnished to the Controller, but he can specially call upon District Engineers for copies of estimates of completed works should he find it necessary to do so.

4 In respect to works other than irrigation, the Controller will be furnished, as heretofore, by the Government Office with abstracts of all estimates sanctioned by Government, and District Engineers will take care that abstracts of all estimates sanctioned locally are likewise duly forwarded to the Controller All estimates submitted to Government, as well as those passed by Local Officers, should be correctly headed in accordance with the authorized classification The classification of Provincial Works will be referred to the several Departments of the Secretariat concerned for any remarks which they may desire to offer

5 Adverting to paragraph 5 it is observed that, as under these orders the estimates themselves will contain all requisite information as to fund, class, main head and sub-head to which the outlay is chargeable, it does not seem necessary that the information should be repeated in the orders conveying sanction.

THE CONTROLLER,
PUBLIC WORKS ACCOUNTS,

To The Secretary to Government

Memorandum

Para 3 of the order has been drafted with a view to prevent a great deal of useless work being done in copying estimates which are likely to have become obsolete before they could reach the Controller

The audit referred to by the Controller as prescribed by Government is it is believed that not before carried out and comprising comparison of actual with estimate rates – This may be very desirable in the future, but it will probably be impracticable with regard to many

which copies of Estimates have;

works which these branches will shortly be completed. Besides this audit is to extend only to works estimated to cost more than a certain money limit.

Neither the Controller's Office nor the Offices in the Districts appear to be equal to their current work and matters will not be improved if a great deal of extra work be thrown upon them.

I would propose to obtain from the Controller abstract estimates of all important works which have not been completed

From
THE CONTROLLER,
PUBLIC WORKS ACCOUNTS,

To The Secretary to Government
Public Works Department

Fort Saint George, 18 August 1875.

Sir,

In my letter No. 111 dated June 3rd 1875, I put forward some general remarks as to the incomplete manner in which Abstract Estimates for Works costing more than Rupees 2000, were supplied to this Office.

2. Since then, I have had the subject investigated, and I have now the honor to forward for the information of Government detailed statements showing all the Works in progress for which copies of Estimates have

and also those for which copies of Estimates have not been furnished to this Office.

3. From the abstract of these Statements, it would appear that the Controller has received copies of Estimates for 200 Works aggregating in cost Rs 46,00,000. For 447 Works aggregating in cost Rs 173,38,000 he has received no Estimates. In other words, for Public Works Expenditure amounting to about 1¾ Crores of Rupees, or nearly £1,750,000, the Controller has not yet been placed in a position to carry out the audit prescribed by Government.

4. I should be glad if abstract Estimates for these 447 Works could be gradually supplied to me. In drawing out these Estimates care should be taken to see that the particular fund, class, main head and sub-head of the account to which the outlay is chargeable is prominently specified. For convenience of reference I have given in Appendix A, a list of all the heads and sub heads of account recognized by the Government of India, and it is extremely desirable that the exact wording of this classification should be scrupulously followed. With regard to the classification of Provincial Works, I must point out that the sub heads entered are those alone which were pointed out in Resolution

by the Government of India in the Public Works Department No 469/B A.G. of 22nd August 1873 as being absolutely necessary. In that Resolution it was left to Local Governments to determine whether any further subdivision should be made, but as no orders appear to have been passed on the subject, it seems desirable that the classification of Provincial Works should now be taken up and definitely settled by the Public Works Department in communication with other Departments concerned. The grouping given under the sub heads I found existing in this Office. If not absolutely required it might with advantage be done away with, as this minute sub division complicates the accounts.

5. In conclusion I may mention that the Fund, Class, main head and sub head to which the outlay is chargeable is required to be shown as much for small sanctions as for the large ones for which abstract Estimates are printed, and that in the case of small sanctions whether for Original Works or repairs such particulars are seldom if ever given in the Government Order conveying the sanction. It would be also convenient if for the smallest Estimate a brief distinctive heading of the work were given at the

No. 2573

Proceedings of the Madras Government
Under date the 8th Sept 1875
Read the following

From
The Contr. of P.W. Accts (H.E. No. 71 W d/ 10th Aug 75)

G.O. 1786 d/ 28th June 1875 and the Memos. quoted in para 1.

[illegible]

The Govt. observe that in the orders as per margin full instructions have been given regarding the classification of Irrigation works and the provision of abstract estimates for the use of the Controller's Office. It is understood however

with

188 (7)

with regard to the latter that the printing of repair estimates in the Proceedings of Govt. while it throws a great deal of extra work on the Press is not of material assistance to the account Department and in modification therefore of the order of the 28th June 1875 No. 1788 the Hon'ble the Governor in Council is pleased to direct that for the future the abstract estimates of Budget works only as revised and sanctioned shall

shall be printed and that the Controller's Office shall be furnished with copies of all other Agricultural Abstract Estimates, whether sanctioned by Govt. or locally by District Officers.

2. It will rest with the Controller to see that all estimates transmitted to his office by District Officers contain upon the face of them the required information and that the headings of all vouchers correspond fully with the

the estimates with which they are connected.

3. The Govt. are of opinion that as regards estimates already sanctioned copies of those only of which the work provided for will not be completed before the 30th September next should be furnished to the Controller, but he can specially call upon District Engineers for copies of estimates of completed works should he find it necessary to do so.

In respect to works other

other than Irrigation, the Controller will be furnished as heretofore, by the Govt. office, with abstracts of all estimates sanctioned by Govt., and District Engineers will take care that abstracts of all estimates sanctioned locally are likewise duly forwarded to the Controller. All Estimates submitted to Govt. as well as those passed by local officers should be correctly headed in accordance with the authorized classification

187

The classification of Provincial works will be referred to the several Departments of the Secretariat concerned for any remarks which they may desire to offer.

Adverting to para 5 it is observed that, as under these orders, the Estimates themselves will contain all requisite information as to Fund, Class, main head and sub-head to which the outlay is chargeable, it does not seem necessary

necessary that the information should be repeated in the orders conveying sanction.
